Foreword

This is a very short book please read carefully with an open mind. Some of the book has original ideas, the most of the religious ones are from my research into near death experiences or NDE's. I have a fond interest in physics in general but cannot claim to be a guru in the subject. I've also since 2013 have got quite religious as a Christian and am a GodTV addict while waiting for my next job to come along. Some of the ideas presented in this book are "out there" & may well fall into bad physics category which the Physicist Wolfgang Pauli described after listening to bad theoretical Physics Lecturer delivering bad Physics declared "It ain't even wrong" if I refused to go out on this limb the ideas presented this book would not be interesting. As Elbert Hubbard said to escape criticism do nothing, say nothing, be nothing, I am taking a serious chance by avoiding his wise advise, my reputation is ruined yet again.

Dedicated to all my friends who helped me through life & my family who are with difficulty putting up with me.

Chapter 1

Consciousness & Intelligence

Consciousness is a measure of ability to understand ideas this ability cannot be programmed, a person just knows because they know & are simply reminded of stuff they knew before they came to Earth. The ability to use intelligence to solve problems. I.Q. is a measure of the speed at which thought will provide an acceptable answer for a problem to consciousness. Intelligence is a measure of ability to solve problems elegantly, the ability to solve problems generally doesn't require understanding except for the few requiring that magic ingredient called common sense. Does common sense require understanding & consciousness?, this is a grey area being challenged by projects such as OpenCyc (google it) which is attempting to give computers common sense, iPhones Siri which uses a cloud of computers on the internet to do speech recognition and give an intelligent answer & Wolfram Alpha which does similar are also recently going into this space with a vengeance.

We think we have a truly deep understanding of the Universe when it comes down to it it really is very shallow. We are just born with an inbuilt ability pick up flavours once we see them they just click, learning might be just an illusion. All words are just a flavour, past, present & future are just flavours of time. Language be it spoken, Mathematics, or an Artform is simply a sometimes emotive means to categorize & describe favours. We usually like some flavours & don't like others, you experience them & some move you.

A computer in possession of a well thought algorithm possesses intelligence, it's irrelevant that the intelligence is programmed, be-

ing explicitly programmed is how computers generally learn, Prolog however is an AI language where the solution is described and all possible solutions are tried I believe. People in college frequently learn similarly using recipes in advanced mathematics, physics or engineering without understanding the underlying principles, this is also artificial intelligence & usually substantially inferior to the intelligence possessed by a well programmed computer! If an Oracle held the knowledge of the Internet & the google search engine in order to ask it questions who can argue that it was not very knowledgeable! The iPhones Siri fits this description.

Consciousness is the witness which travels with the body through life operating the body through the brains levers & responding to feedback given to it through the brain indirectly from the bodies nervous system. The brain is consciousness's interface of sensory input, whether the brain does more is a matter of debate.

The brains purpose at most is the recognition of sensory input, do computation & recalling memories on consciousness's demand. Automation of skills e.g. reading, writing, speaking languages, playing a musical instrument. A bidirectional interface where consciousness generates physiological responses to emotion & where physical pain or pleasure invokes an emotional response from consciousness. The rest quite probably is a ghost in the machine. Learning might only be an illusion, as Plato's Teutonic Model put it maybe we are just being reminded of knowledge already known from the cosmic consciousness. People who have near death experiences claim even inanimate objects like the Earth is conscious & is quite upset with the way we are treating it!

Your brainwaves slow down when you relax. this happens in Buddhist meditation [14]. Brainwaves might be the frequency you tune into the your consciousness at outside your body possibly through the Pineal Gland as suggested by Descartes in the middle ages, it's as reasonable explanation as the bs Cognitive Scientists come up with.

Chapter 2

Science

All our knowledge has it's origins in our perceptions.
Leonardo Da Vinci

It is a mistake to believe that a science consists in nothing but conclusively proved propositions, and it is unjust to demand that it should. It is a demand only made by those who feel a craving for authority in some form and a need to replace the religious catechism by something else, even if it a scientific one.
Sigmund Freud

Every sentence I utter must be understood not as an affirmation, but as a question.
Neils Bohr

Science is a method of describing the Universe & is based on largely reproducible observation which excludes divine intervention. It does this by providing formulas which hopefully accurately describe physical phenomena like Newtons laws of gravitation & motion. The notion that a compact formula can describe phenomena is called algorithmic compressibility. Humans containing only limited memory & only able to take in things of limited complexity generally desire algorithmic compressibility from scientific theories. Another way of looking at algorithmic compressibility is Occam's razor which states that "the simplest explanation of the facts is most likely to be the correct explanation." It's amazing that God made the laws of physics so intelligible & algorithmically compressible, this stunned Einstein, a computer program contain-

ing a simulation of the entire Universe using the known laws of physics & the constants of physics to the best known accuracy could probably be implemented in less space than the amount of computer memory that it takes to hold an electronic copy of this book, admittedly if the variables aren't also compressible it would need an infinite amount of space to contain the variables of the running of the simulation itself & it would run infinitely slowly on a normal computer.

Scientific theories are more likely to gain acceptance when they make predictions which are later verified & explain phenomena not explained by current theories. Einstein's theory of general relativity made a prediction that light would curve in the Sun's gravitational field, this was verified in 1919 by the British astronomer Arthur Eddington. Einstein's theory of general relativity thus superseded Newton's theory of gravitation as it described the phenomenon of gravity more accurately.

Einstein came up with most of his theories using thought experiments. For special relativity he primarily based his work on the implications of the Michelson Morley experiments, that light travels at the same speed for all observers & after a few years work drew very insightful conclusions from this observation. For general relativity Einstein recognized that a person in a box would have no means of telling whether they were stuck on a planet and experiencing gravity accelerating weightlessly through space & experiencing G forces from this he drew more insightful conclusions.

Einstein had no idea why his aesthetically beautiful theories described the Universe so accurately & elegantly. Science proves nothing & does not explain anything, it never will, ultimate understanding through science is an illusion, all the answers it gives are superficial. The easiest way to annoy scientists is to just keep asking them "Why did that happen, please tell me?" & just let them keep answering because..., depending on their maturity they may get more annoyed & frustrated about having their naive belief systems that they really understand what is going on challenged. Here's an example loosely based on an insightful interview the Nobel Prize winning physicist Richard Feynman did for the BBC show *Horizon* in 1981.

Q: Why did the woman fall on the ice?

A: Because it was slippery.

Q: Why did that happen, please tell me?

A: Because a thin layer of water formed on top of the smooth surface of the ice.

Q: Oh that's very interesting, why did that happen?

A: A relatively complicated reason to do with the pressure causing water to form on top of the ice as water takes up less volume than an ice crystal for the same number of molecules.

Q: You must be a very clever man, why did that happen?

A: Sweat pouring off, an answer which even the scientist doesn't fully comprehend or appreciate probably involving the Pauli exclusion principle & some other quantum physics sincerely hoping not to be challenged any further.

Q: I'm impressed, you must be very knowledgeable, why did that happen?

A: Dunno...

We can't even explain why $1+1=2$ the neural net we have for a brain just eventually gets the abstraction when shown enough training examples in primary school then we just know it to be the case, what is understanding?, we can't define it & describe it as an algorithm for a computer so we really understand understanding? Admittedly computers can be programmed to count.

Galileo was tortured & eventually died of natural causes while imprisoned by a fundamentalist religious nut who happened to be a Pope by offering heretical evidence that the Earth is not the centre of the Universe. Spiritualists have been paying for this ever since, atheists for the past 300 years have been going the other way by claiming that there is no place in the modern world for spirituality, we have entered the dark ages of spirituality.

In the Pandora's box of ultimate scientific understanding there is always God just that you'll probably need to dig your way to a dead end to find him & even then atheists will try to keep digging! The spiritual person doesn't look for scientific explanation they know that science exists in the spiritual & God is behind it anyway. The scientist might be wasting his time as some ideas might lie beyond

the grasp of reason.

God gives of all different views of the world through our life experiences, some he gives supernatural experiences, usually ones which completely contradict what other peoples experiences. I had a few, some he gives above natural ability in science. The open minded must accept both as genuine. If a mentally handicapped child sees the Virgin Mary in Medugorje it is pretty stupid to believe a child who sees with it's own eyes less than a physicist working at CERN that has just discovered the Higgs particle predicted by the standard model which is built on an intellectual ivory tower which only a very very small percentage of physicists in the world actually understand, these guys are looking for a Nobel Prize the glory of being up there with Einstein & billions more euros or dollars in funding to continue their research, they have far more reason to lie & believe their own BS than the mentally retarded child. Whatever people are seeing in Medugorje I am personally 99.9% certain that it is real & it wants us to stop going to War & start praying, I personally hope it is the Virgin Mary & not something supernatural or extra terrestrial deception, I don't like being bs'ed to even if done with good intentions.

If Atheist Scientists had weird boogieman supernatural experiences which freaked them out like a large percentage of the population shamanic & supernatural experiences would be taken more seriously by the scientific community. It is a shame when respected Nobel prize winning mathematician & economist like John Nash "A Beautiful Mind" was shamed by peers, doctors & himself to believe his hallucinations were not real, like other madmen his judgment & delusional thoughts forced him to doubt himself, this is peer pressure at it's worst. Madmen are often given reasons to believe their delusions like beliefs that they are able to control the weather or are reincarnated Adolf Hitler's or Jesus's or time travelers in their reality they are usually given plenty of personal circumstantial evidence to back up their case.

The atomic physicist David Bohm said "people are addicted to their beliefs", atheist & spiritualist alike. "The man convinced against his will remains of same opinion still". Richard Dawkins the famous atheist springs to mind. So called scholars guard their aca-

demographic reputations & scientists ignore miracles because God won't bend to their will when they conduct silly experiments, the Bible says "Thou shall not put the Lord to the test", Jesus meant it, also they may affect psychic experiments by intimidating psychics. Miracles typically only happen in crisis situations where situations are occurring which are against Gods will or the will or the will of a good person who prays a lot & is primarily interested in the greater good. The closest thing I can think of as an experiment for the power of prayer is to send terminal cancer patients to work with Heidi Baker of Iris Ministries & see how many survive once they & their family start praying praising god & helping in the people of Mozambique any way they can financially or otherwise food an clothes are possibly the best way owing to the corruption in Mozambique , with Jesus's help Iris Ministries Missionaries has raised approximately 100 people from the dead in Mozambique & Heidi & her Husband Rolland a Caltech trained Physicist & miracle worker regularly gets terminal diseases herself which Jesus regularly cures.

As an aside The Bible in the Book Of Chronicles 33:6 states "He practiced soothsaying, divination & sorcery & had dealings with mediums & spirit guides. He did many things displeasing to Yahweh, thus provoking his anger". It advises against the use of psychics.

The laws of physics were created so that man could exercise his free will & morality in a predictable reproducible way by using his hands or technology like the atomic bomb to do his bidding with minimal divine intervention, Gods intervention is hidden well enough to keep man doubting his existence.

Richard Feynman was notorious for blasphemies about doing experiments on holy relics, I'd suspect he became an atheist because he couldn't accept that God would let the woman he loved died of Tuberculosis.

According to [10] even atoms are living, they just obey the laws of physics on autopilot except during divine intervention. I've seen a video of Molybdenum alloy under an electron microscope crystallising on BBC4 theres no sign of it on YouTube but you'd have

little doubt the Metal is living watching it. Prior to creating the Universe we with Gods help chose the laws of physics & morality.

Also according to [10] & [18] cells & our unconscious mind both contain all our memories are our memories are imprinted in our genetic coding so strengths, weaknesses & fears are transferred to our offspring, maybe this influence is an explanation for evolution also maybe our cells become what they desire to be in our offspring. Evolution & Protein folding my be driven by God making use of the fine tuning that can be done outside the measurable aspects of physics. Cell memories according to Sid Roth's TV shows transfer to the donor during Blood transfusions & Heart transplants.

The difference between the past & now is the level of arrogance. Man now thinks he is a God & is filled with arrogance. The great learning and knowledge is generally not being used to further each other but to advance self. The invention of the atomic bomb made Gods out of scientists.

Looking at the way science is progressing, the largest machines in the world costing many many billions of Euros like the collider at CERN to look for ever smaller particles. String theory the prime candidate for a theory of everything up to recently didn't make any predictions [21] observable even with machines billions of times more powerful than the colliders at CERN.

2.0.1 Mixing science & spirituality

It is getting exponentially more difficult to make progress in pure science, that gold seam of knowledge is getting exhausted. It will come through tough concentrated reasoning between science & spirituality that new doorways of investigation will open.

One only has to read [1] to recognize that there is a lot more to the world than can be explained by science. There is a very significant percentage of the population who have witnessed miracles, near death experiences, shamanic experiences, have phantom limbs, drug induced alternate realities, Reiki or bioenergy healing, see Chakras or auras or are in psychiatric hospitals, old folks homes witnessing entirely different realities to the one the rest of

us witness. Possession by spirits in Bali is generally seen as a pleasurable & valuable experience. It is more likely to be construed as a temporary altered state of consciousness rather than a long term infestation in need of urgent treatment [22].

As for the physics which occurs in the singularity inside a black hole who cares we don't need to know it anytime soon & when we do God will tell someone all about it. According to [10] during the creation of the Universe we with God choose the laws of morality & the laws of physics.

A pet idea of mine which is probably not original is that string theory has something to do with music. If it does I'd suspect that the multiplicative distance between the frequencies of semitones $2^{1/12} = 1.059463094$ is of significance the $1/12$ factor comes in because there are 12 notes in an octave which is a doubling of frequency. Some musical instruments especially in the past were tuned to specific keys so the multiplicative relationship between semitones vary from semitone to semitone on these instruments. Pythagoras also believed that music was scientifically important.

Another even less likely pet idea of mine is that God might only intervene in the Universe using the Heisenberg Uncertainty Principle (HUP), & when controlling the moment when radioactive elements decay. The HUP basically states that to know the position of a particle within a certain precision you can also know it's momentum to a certain precision, the more accurately you know one the less accurately you know the other. This inequality equivalently occurs with time & energy. As energy can create mass according to Einstein's theory or relativity energy can be borrowed temporarily from the vacuum to create virtual particles which exist for a small amount of time & the particle disappears & the energy debt is paid back to the vacuum. If God interfered in this way he would be undetectable by Science.

God may also be able to influence matter by causing antimatter to collide with matter particles & disappear in an explosion eliminating both particles completely in a burst of energy. Richard Feynman often thought of antimatter as matter travelling backwards in time. Just like in chaotic systems where a Butterfly flap-

ping it's Wings in Peru can potentially causing a Hurricane in Los Angeles God might only need to intervene in small ways, create a few virtual particles, speed up a few others to create a large overall effect.

It's very unlikely but [19] talks about apparitions needing to borrow "Energy" from Guides to appear, could this be what Doreen Virtue is talking about? In short miracles might not disobey the laws of physics with the exception of the violation of the 2nd of Thermodynamics, however, God can mess with this we can't. It may even be the case that the laws of physics are only normally observed when man is utilising them.

2.1 The Schrodinger Cat

The Schrodinger Cat thought experiment was originally thought up by the Austrian physicist Erwin Schrodinger in 1926 to highlight the ridiculousness of quantum physics, it now is being used as an example to describe how quantum physics really is. In the thought experiment a cat is locked into a closed box with a radioactive substance which ejects a radioactive particle at random intervals, there is also a radiation detector in the box which will detect this radioactive particle if it is ejected, if a radioactive particle is detected a gun goes off which kills the cat. The box is soundproof & all the walls are opaque so the only way of telling if the cat is dead is by opening the box. The rules of quantum physics dictate that the cat is in a superposition of states, both alive & dead until the box is opened & observed this observing causes a "crystallizing of reality" which in quantum physics is called the "collapse of the wave function". Some quantum physicists don't believe in these alternate realities I personally do & will be discussing them in the rest of the book as though they do exist.

To date cannot be proven one way or the other whether simply a detector causes this "crystallizing of reality" or whether a conscious observer is ultimately required. As conscious observer is always required to ultimately view the results of an experiment

we cannot say & this has been wrecking the heads of scientists & philosophers for 80 years. Many books on science & spirituality have been published of which this is one which quoting exactly a highly intelligent atheist colleague of mine who also has a strong interest in physics take the format of..

quantum physics - > observer - > consciousness - > bullshit.

pardon the French! If it can be indeed shown somehow that an consciousness is required to collapse the wavefunction the atheists would be running for the hills! That said a more speculative definition of consciousness is that it is that property which collapses the wavefunction. On a religious note our wavefunctions may be collapsed because God is watching Us.

Other bizarre oddities of quantum physics well worth researching on the Internet are The Elitzur-Vaidman bomb testing problem which has been verified experimentally. This allows one to test if the fuse of a bomb is a dud & find a guaranteed good one without exploding it given a large supply of questionable ones.[12]

Wheeler's delayed choice experiment is also interesting philosophically in that one can influence which slit a photon of light goes through in the past simply by blocking it. This however is not quite as interesting as a photon of light oddly enough being massless travels at the speed of light & as a consequence of this is from own perspective in spacetime according to Einstein's theory of Relativity has no concept of time, our past present & future is the light beams present. This is far more interesting for electrons than photons which have mass so you are truly influencing the past in all spacetime frames.

One of the greatest mysteries to science is why the constants of physics are what they are. Especially why gravity is so much weaker than the electromagnetic force, an example of this is when you run a plastic comb through your hair to pick up a piece of paper you are overcoming the gravitational force of the entire Earth!

The strong anthropic principle states that the Universe must have those properties which allow life to develop within it at some

stage in its history. In other words the a Universe cannot form unless there are conscious observers to watch it at some stage in its history.

Anthropic principles generally freak atheists & is seen as a scientific cop out that imply the existence of God.

Lets take a quick look at how this principle ties the constants of physics for us here on Earth. If everything was massless and moved at the speed of light according to the theory of relativity the universe would be over in an instant, God had to invent mass. If gravity was say 6 times stronger we humans would probably be unable to move. If it were 6 times weaker like the Moon the Earth would have no atmosphere, this would mean we could not use air all around us for the chemical reactions needed for life to take place & their would be no foodchain. If nuclear forces were even slightly different the Sun would not be able to make the Carbon-12 so vital to life on Earth. My distant cousin John D. Barrow has written a few masterful books on the subject.

2.2 What is the Universe?

There is a concept in quantum mechanics which Einstein referred to as “Spooky action at a distance” or the EPR paradox. This happens when a pair of particles e.g. electrons interact with each other & are set up to have a quantum property e.g. total spin to be 0. The electrons then fly apart not interacting with anything else till the experimenter decides to look at them while the particles are travelling apart across the Universe, they are both in a superposition of spin states, both up & down. When the experimenter decides to measure the spin property of one electron owing to the “collapse of the wavefunction” described in the previous section. the spin property of the other electron is instantaneously equal but opposite, i.e one electron spin up the other has spin down, this shows that non-locality is indeed a property of the quantum world. How can the Universe be considered 3 dimensional in the Newtonian sense if interactions can happen across its entire width instantaneously. The Universe is not really a thing as you would expect in Newtonian physics, I personally believe it is a process in Gods mind which is brought into reality by conscious observers

like ourselves observing it. Newtonian physics allowed instantaneous action at a distance too, with gravity, but made no attempt to explain it.

Chapter 3

Spirituality

Thomas Aquinas a medieval monk gave what I think is the most elegant proof of Gods existence & it still holds today, which might have been anticipated by Aristotle. His proof is based on the idea of the original mover. Everything that moves has to be caused to move by something that moves until ultimately something which doesn't move causes the first thing to move. The thing which doesn't move is God. The first movement was The Big Bang what caused that?

Another interesting observation offering evidence of Gods existence made by Socrates is that everything has a use even if it is only to be beautiful.

A spiritual event is where the laws of physics are disobeyed. Miracles are when a spiritual event occurs in this Universe sometimes believed to be caused by asking God or some other spirit to intervene through prayer. The probability of a scientifically explainable occurrence + the probability of a miraculous occurrence = 1.

Hallucinations are when a person's mind views an alternate Universe where a spiritual event occurs, this can be thought of as the inverse of a Miracle. Sometimes hallucinations occur as a result of a lack of sleep this might be ones dreams projecting into reality.

Some forms of madness occur when an individual cannot accept the normal reality God has created for them & the individual wills

& seduces themselves a more comfortable less traumatic personal alternate reality or Universe for themselves to live in where spiritual events occur. Popular successful authors like Deepak Chopra & Doreen Virtue believe you can ask the Universe for whatever you want & you shall receive “if you ask from the soul not the surface” this is I believe because they didn’t chose God to intervene more in their lives, there are good people who pray & bad things happen to them in this life, they most likely chose prelife to suffer for spiritual growth.

Madness’s called Manias are people who believe they are going to be the next U2 or great concert pianists & are personally stunned when the World doesn’t acknowledge their greatness, belief that one is smarter than Einstein, reincarnated Jesus’s or that they are X-Men who can timetravel. This is a main highway into an alternate reality caused by craving & delusion.

According to some psychiatrists during manias people regress to the time during their “terrible twos” when they believed they were the centre of the Universe & desire to be a higher power than their oppressive parents & environment. Lets face it most people not yet forced to face the responsibility of parenthood want to be an X-Men & grow up when they have to put childish wants behind.

Other examples of routes into alternate realities are people whose loved ones have died & they make dinner for them & appear to be talking to the ghosts of their dead loved ones. People after a serious Car accident may meet their dead mother who tells them they are going to be alright. Anorexics who think they are fat maybe living in alternate realities. Schizophrenics who are hearing voices I personally believe should be exorcised of their daemons.

Atheists are doubting Thomas’s they only believe in what they can see & touch. Most atheists view spirituality & religion as a sickness of the mind anything which cannot be reproduced under laboratory conditions doesn’t happen. Science is the religion of skepticism & when atheists are involved can be as dogmatic as medieval christianity.

3.1 The Cosmic Consciousness

The Cosmic Consciousness is the sum total of all the individual & spiritual consciousnesses in the Universe & is a small part of the mind of God, we are all part of the Universe that has become aware. God is the largest collective consciousness that is Good. The No. 1 question I have for God is how his consciousness was always there, the Universe is just an illusion created by the God & is of less relevance. According to Pythagoras we are all parts of God who are separated from him in this life to express our individuality. Creation is God exploring God's Self through every way imaginable, in an ongoing, infinite exploration through every one of us.

A Meme is another way of looking at an idea, ideas are rarely original & are usually spread from one human mind to another by communication, they can be considered to spread like human genes, original ideas are never truly original but are probably communicated to us from God or some other spiritual entity.

Ideas & conscious minds are distinct entities. Physical minds are vessels for carrying memes in the real world. Minds are just containers for ideas & values. It might be nice to think that there is no such thing as an evil mind just evil ideas, however this is not the case God gives us choices.

Each concepts might be stored in a precise location in "concept space", gaining understanding might be zoning in on this concepts location. Truly original ideas or concepts are all that really need to be known as these cannot be got to from other ideas & reasoning these are like prime numbers.

Ideas may fly in & out of minds from one person to another like pigeons flying in & out of pigeonholes. The best eureka ideas often fly so fast between people they almost hit them at the same time, this often happens in science. Synchrodestiny of inspiration to keep scientists modest the true origin of a important ideas is probably divine inspiration.

Just because drugs can induce hallucinations & there is an area of the mind devoted to fantasy might not mean to me that hallucinations are in the mind.

One of the consequences of the Schrodinger Cat thought experiment described earlier is that whenever a sub atomic event with multiple possible outcomes occurs all of these outcomes become real and form a series of parallel Universes that have a separate existence & development. Our consciousness inhabits just one of them, the reality we experience. This is the “many worlds” theory as initially proposed by American Physicist Hugh Everett, these many worlds coexisting is another building block in my argument.

One of the possible interpretations of the Strong Anthropic Principle is that the conscious mind may be of central importance to what one perceives as reality, I believe that altering the brain’s state e.g. by giving the victim drugs, alters the reality the victim experiences to one of the other “many worlds” different to the one experienced by the rest of us who don’t have our brain state altered, this is somewhat akin to the victim tuning into a different television channel to the one that sane people watch. Clarification is needed here, by consciousness determining reality I mean that altering the victim’s brain state determines the flavour of the reality being experienced by the victim, the victim I believe cannot influence the direction of his or hers experience by choice. There are other ways of altering our brain state besides Drugs e.g. a strong electromagnetic field might alter the way synapses in the brain fire, a victim having a brain hormone imbalance & going mad will cause the victim to experience an alternate reality. Having sanity explained by a hormone imbalance in the brain is denying the Miracle of consciousness pharmaceutical companies & consultants which charge vast amounts of money for drugs for mentally ill patients is at very best curing a symptom rather than the underlying problem.

Consciousness is most likely the only reality, the Universe, the rest, is what the Indian people call Maya, the beauty which hides the reality. How else can one explain how 70,000 pilgrims at Fatima in Portugal in 1917 saw the Sun tear itself from the heavens & come crashing down on the multitude [26]. Thousands have

seen the Eucharist spinning in the Sun & the crosses on the hills in Medugorje appearing & disappearing. We tune into different realities.

Maybe ones brain tunes just like a radio tuner into good, evil, confident, fearful, loving, hateful, thoughts from the cosmic consciousness or the unconscious mind by habit or temporarily choosing to, maybe brainwaves are literally the frequencies we are tuning into. A lot of thoughts are not our own but those of spirits we tune into, Einstein tuned into the God channel, comedians the conscious mind is not as quick witted as divine inspiration, you've made your witty pun before you have even thought about it consciously. Watching how others behave can cause people to change their tuning, watching soap operas or people behaving badly can have very negative effects on most people & they may take on this life script as their own, not interacting with people can affect judgment & cause one to go mad. Judgment, how you act on these thoughts is done in consciousness might be mad, delusional or wishy washy dependent on drug or hormone levels or brain damage & swings in confidence. Schizophrenics are caused by a combination of bad judgment & sometimes tuning into a sometimes demonic channel for thoughts. Think correct thoughts & correct actions follow.

Altering the brain's state while the victim is alive is equivalent to altering the victims conscious state. We are spiritual beings, God made us flawed machines largely understandable to ourselves from a science perspective so we would be able to learn to repair ourselves except for our consciousness. Some well known authors have come up with interesting arguments trying to explain away consciousness by saying it doesn't exist, I believe they are wrong. The brain is only a physical manifestation where consciousness appears to take place while the victim is alive. Doctors may talk about scientific things like brain hormones & can find out when we are dreaming by measuring brainwaves & have a basic map of what part of the brain does what from measuring brain activity using EEG's & studying braindamaged victims, but to be honest they don't have a clue how brains work, this alteration of brain state has to be accepted as being spiritual. Science might one day be able to explain the brain as a conscious less zombie computer which has neural net algorithms deciding what to do next, but I

wouldn't expect it anytime soon.

I myself personally believe that God normally only crystallizes the reality of one Universe for normal people & then creates others temporarily when observers need to witness an alternate Universe or else a madman insists on going his own way & creates his own personal Universe, some variant of the anthropic principle may apply to this alternate Universe. The Universe that most of us witness is the Universe created by democratic agreement on reality in the cosmic consciousness of the Universe. Individual viewpoints mesh so that your world & mine can harmonize.

People witnessing the Virgin Mary in Lourdes or similar are multiple people seeing the same hallucination, this is how Mary does her work, like most women she is chatty & likes talking to people, nice woman. Surely Occam's razor should apply here, the simplest explanation is the most likely, it is much easier for God to create one alternate reality for these people to tune into than give them all in the head experiences. The only difference between these visions & the hallucination of a madman's that nobody else witnesses the madman's hallucination so he has nobody to back him up.

When people suffer from a lack of sleep they sometimes hallucinate these are regarded as shamanic experiences. This I believe is because dreams are used to unload the subconscious mind & if this fails to happen due to a lack of sleep the dreams get projected out of ones head into the real world.

Rarely after a lot of drink people believe they are being chased by Rats & attempt to climb walls etc. to avoid them. This commonly happens to people suffering from Delirium Tremens DT's. This I think is not a figment of peoples imagination but a very real experience in an alternate reality, I believe this is God's way to scare the hell out of self destructive drunks to get them give up drink.

For conscious entities time is just a measure of rhythmic machine ticks, sometimes it moves fast, sometimes it moves slow, "A watched kettle never boils", in life & death situations an altered

state of consciousness occurs where time moves very slowly of victims so they get time to react, for some people their entire life flashes before them in a moment, some people report only seeing things in black & white because the brain doesn't have the time to process colour images. Large doses of adrenalin causes an altered state of consciousness which slows down time for the victim. In combat situations soldiers have reported being able to dodge bullets like a baseball player ducking a baseball.[15] If slowing down time for conscious beings is possible why not timetravel?, Some people in who get put into psychiatric hospitals experience time-travel, these grandiose thoughts can be caused by a lot of psychotic disorders but are generally caused by a serotonin & dopamine hormone imbalance.

LSD & Magic Mushrooms can take drug abusers to Alice in Wonderland alternate realities, these realities can be places where the World is flat & the planets are carried around by angels, Galileo I suspect was only correct about our reality.

3.1.1 Near Death Experiences

God has been providing people with glimpses & hints of Heaven at least since man first walked the Earth. Outer body experiences or OBE's are usually near death experiences or NDE's when the soul or consciousness temporarily leaves the body & floats above it, from this perspective the person having the OBE can see things which would be impossible to see if the consciousness remained in the body, OBE's prove there is a split between mind & body [19] Doreen Virtue was told that this is what she is to teach as a child during her OBE by an Angel or Spirit Guide. Blind people can see during NDE's & show no brain activity while this is happening. Near Death Experiencers see colours which don't exist on earth these most likely are outside the visible spectrum and probably can see radio & gamma rays as colours. When the person is brain dead the consciousness is fully released from the body.

Some of the following events typically happen during an NDE not necessarily in order.

A feeling of popping out of ones body, sometimes accompanied by

a buzzing usually during a trauma like a car crash or a heart attack.

Floating above your body & gradually becoming aware that the body you are looking at is you.

Being able to see 360 degrees around with ones soul eyes, travel through walls & at great speed to places just by thinking about it, ones body in this state feels like a horrible cumbersome unnecessary suit.

Blind people are able to see & able to see colours not seen on by us as humans, not having seen these colours are not able to imagine them gives strong evidence that one is seeing colours outside the human visual spectrum, probably every light frequency from almost 0Hz (DC) to gamma rays & beyond, also, gold streets & buildings in Heaven are transparent implying our soul eyes are able to view X-rays, seeing colours not seen before by humans is unimaginable to the person prior to the event, at least me.

Existing outside of time, God says time is only made for mans convenience another part of the experience unimaginable in dreams.

Being of infinite intelligence & able to learn vast volumes of knowledge instantly & being able to communicate volumes of knowledge & emotions to other spirit beings instantly.

Some can have a negative experience & go into the valley of the shadow of death until they call out for help from Jesus who then saves them, one might stay there for quite a while owing to shame as they become aware that one can hide nothing from God or anyone else in heaven.

Meeting angels, relatives or spirit guides.

Travelling through a tunnel at great speed to a light brighter than any sun which is usually recognized as Jesus although some people of Hindu religions might recognize him initially as Krishna.

Having the ability to acquire all Gods knowledge.

Having a life review on a large screen complete with smells at great

speed & being able to observe the consequences/ripples caused by ones good & negative actions in their life, Hitlers must have been Ugly.

Having a fantastic trip around heaven.

Being told that they must go back to the land of the living or being given the choice to go back.

Losing most of the vast body of knowledge one acquires & going back into ones body.

After arriving back on Earth people have an entirely different perspective on life, which might be relaxing & not sweating the small stuff, becoming more passionate & motivated, having a thirst for knowledge, change in careers & generally becoming a more positive & loving person.

Some people go to Heaven where they meet Jesus & sometimes have a Judgmental experience, some when having an NDE due to drugs overdose or attempted suicide have a hellish experience.

Some find that God is not Judgmental at all and has completely unconditional love, these people must be warned that the Devil can disguise himself as a Angel of Light according to the Bible in 2 Corinthians 11:14-15

14 And no wonder, for Satan himself masquerades as an Angel of Light. 15 It is not surprising, then, if his servants also masquerade as servants of righteousness. Their end will be what their actions deserve.

NDE's aren't completely without some scientific explanation. According to [23] the drug ketamine can reproduce all the main features of the NDE, travelling through a dark tunnel into the light, the feeling that one is dead, communing with God, hallucinations, out-of-body experiences, strange noises, etc. Also patients who appear brain dead may in fact be capable of conscious thought. In 2006, scientists in the UK and Belgium did an fMRI (functional magnetic resonance imaging) on a woman in a vegetative state and

found that parts of her brain showed activity when she was spoken to and asked to think about things like playing tennis.

One route to creating alternate realities on demand is hypnosis but after research I found out that people under hypnosis when asked know that what is happening is not real. I've however found more contradictory evidence where a child was able to read a watch through an invisible person. I'd suspect if the person under hypnosis was given the suggestion it is real that the "Leprechaun" or whatever would be real to the person in question. God will only intervene in our life at critical points when we ask him before coming to Earth & the rest of the time he just doesn't get involved as we need experiences for spiritual growth. Some authors like Deepak Chopra & Doreen Virtue claim we can simply ask Somewhere up above there is a Universal guidance system & you are on that radar screen. Hypnotism is not very successful in stopping smoking, drugs sometimes have no effect, however hypnotism it has temporarily cured diabetes in some patients, If something out of the ordinary happens by hypnotism it can be considered equivalent to madness or a Miracle. God has a divine plan & operates in mysterious ways & what works for one person will not necessarily work for another.

Dr. Francine Howland a Yale psychiatrist who specializes had a patient with multiple personalities, who suffered a wasp sting. This patients eye was completely swollen shut from the wasp sting, one of this mans alternate personalities was an "anesthetic personality" when this personality took control of the body, the pain ended, by the time the man arrived at his appointment at the ophthalmologist the swelling was gone & the eye had returned to normal, however, after being sent home the mans original personality returned along with all the swelling of the wasp sting. Maybe there is something to this mind-body-spirit thing.[1]

The Swiss psychiatrist Carl Jung had a patient who was a young man who suffered from paranoid schizophrenia, who was having a hallucination where when he moved his head from side to side the Suns "Penis" moved & caused the wind to blow. Several years later Jung came across a 2000 year old Persian religious text which consisted of a series of rituals & invocations designed to bring on

visions. It described one of the visions that if the participant looked at the Sun he would see a tube hanging down & if he moved his head from side to side it would cause the wind to blow.[1]

Stanisav Grof the chief of psychiatric research at the Maryland Psychiatric Research Center while investigating the clinical uses of LSD at the Psychiatric Research institute in his native Prague were able to tap into the Cosmic Consciousness of different people at different times, for example Grof had one female patient who assumed the identity of a female prehistoric reptile & was not only able to give a richly detailed description of what it was like to be such an animal, she noted that the most sexually arousing part of the male dinosaur was the coloured scales at the side of the head. Grof later confirmed with a zoologist that the coloured scales on the heads do play an important role as triggers of sexual arousal in reptiles.[1]

Peoples lives are full of coincidences a friends father told me he saw the Eucharist spinning in the sun while at Medugorje. I have a friend who had the same image come to him while meditating two days later. A former teacher of mine said the last thing he saw before he went blind was a fox carrying a white cat in his mouth while driving. Two days later I saw a tapestry at a friends cousins house of a fox carrying something white in his mouth. Coincidence or Synchrodestiny? I think Synchrodestiny.

As physical beings the most obvious & reliable way to affect change is through physical action. If one believes in spirituality the other way is to ask a spiritual entity through prayer. Everything that happens in this Universe has to either be caused by Miracles, the laws of physics or by mortals physical action.

3.1.2 Mind-Body-Spirit

You can tell a lot about a person through their self expression, admittedly you can't judge a book entirely by its cover. cars, colourful clothes like a dandy, how they carry themselves. the holding positions of the body reflect their mind, do they have a pain in their neck?, who is it? According to [25] our biology is our biography, unresolved emotional pain manifests as physical pain.

Pets give an excellent reflection of the emotional state of the people they are emotionally involved with. Doing yoga stretches forces the mind to relax so the person can gain flexibility. Laughter is the best medicine, think sick, get sick. Placebos are a measure of faith in false medicine & further evidence of the mind-body-spirit connection. Christian science believes that most sickness is in the mind & Doreen Virtue [?, visionsII]elieves that checking for illness might give reality to it.

Chapter 4

Ethics

Moon rocks are OK when everyone is eating.
Goodman Ace

4.0.3 Not being the best you, three common modern Sins

Individualism: whats in it for me, the father of selfishness. Hedonism: if it feels good do it, slavery to pleasure, in the end this sin produces despair. Minimalism: whats the least I can do & get away with it, the father of mediocrity. [27].

4.0.4 Titheing

Leviticus 27:30-33

30 A tithe of everything from the land, whether grain from the soil or fruit from the trees, belongs to the Lord; it is holy to the Lord. 31 Whoever would redeem any of their tithe must add a fifth of the value to it. 32 Every tithe of the herd and flock every tenth animal that passes under the shepherds rod will be holy to the Lord. 33 No one may pick out the good from the bad or make any substitution. If anyone does make a substitution, both the animal and its substitute become holy and cannot be redeemed.'

Luke 11:42

noindent 42“Woe to you Pharisees, because you give God a tenth of your mint, rue and all other kinds of garden herbs, but you neglect justice and the love of God. You should have practiced the latter without leaving the former undone.”

I personally don't believe in charities for research into cures for cancer, they well might be out there already like wheatgrass & baking soda & kept hidden by doctors ignorance & the illuminati admittedly this could be fantasy bullshit used to sell books but it's certainly worth trying & let me know how you get on if you are not trying to sell books on the subject barrow_dj@yahoo.com. Eyes for India <http://eyesforindia.com> and other third world are excellent charity. Eyes for India cures cataracts for as little as 75 Euro, blind people can see for this money, it changes lives.

I'm also dubious of the few greedy televangelists out there of which there are a few, I've been guilt of overenthusiastically donating before doing research. Some are worth \$100,000,000 before donating check the net worth of the chief televangelists of the organisation on the internet, as with all internet info this could be false use your own judgement too. If they spend 50% of their time advertising for money ignore. If they claim their tax returns are publicly available but aren't I've seen this in an organisation with 500 members which produce a new book every 2 days which the head evangelist claims to write, or claim to be a registered charity but aren't stay away from them.

Calling the God of the Old Testament a bully or a c%t is fashionable saying alleluia or praise you Jesus thank you Jesus is considered by some to be over the top, that's how little respect people have for God these days. I love Van Halen & think Eddie & Diamond David Lee Roth are fantastic but they have a song called Running with the Devil which is starting to upset my few Christian values. Pope Francis does similar.

4.0.5 Fracking

Fracking is the collection of natural gas from underground shale stone. There is a substantial organisation in Ireland which is anti

fracking. Some drive big cars so they are abusing OPEC nations fuels & not brave enough to accept exploitation of the environment close to home. Fracking pumps 650 chemicals into the ground and can damage underground water & the environment & sometimes natural gas gets into the water which means that you can set water coming out of a faucet alight. Rather than banning fracking the harsh chemicals pumped into the ground should have friendly alternatives like olive oil or guar gum & the natural gas coming out of the faucet should be harvested. The only remaining problem is earthquakes which can be sorted by prayer to Jesus. Jesus I trust in you as St. Faustina used to say.

4.1 Economic Truth, Rothschilds, Federal Reserve & The Illuminati

The Rothxchilds used mind the Gold of Royalty in a big Safe during the middle ages, they used the Gold they minded to get Rich. Their big break happened just after the Battle of Waterloo, they sent a spy over to give them advance info on who won the War. They found out the British won several hours before it became common knowledge & and started a wild rumour that the British lost this made prices on the English stock exchange plummet to about 10% of their true value & the Rothschilds bought the shares up & made a killing. They were worth 5 billion dollars in 1865 & have invested in both sides during the first & second world wars. According to [28] which might be wild like most internet conspiracy theories the Rothschilds control half the planet's wealth \$231 trillion & considering Apple computers is the World's richest commonly known company & is only worth \$650 billion dollars this is an amazing flight of fancy.

What is true is that the Illuminati, Freemasons, Satanic Worshipers, The Company of 300 Rothschilds & Rockefellerers control the World Banks. Obama and all politicians are puppets. The American Red Cross is owned by the Rockefellerers.

The U.S.A. owes 17 trillion dollars to whom, not the Chinese they only own \$1.317 trillion of U.S. Debt as of January 2014. The Federal Reserve which prints the U.S. Dollar is a private company

not owned by the U.S. Government. The European Central Bank Directors are above the Law and can't be tried in Court. America spends \$650 billion a year on defense because there is no Gold backing up the U.S. Dollar, likewise the Euro. When Oil companies refuse to take the Dollar Wars start.

4.1.1 Pope Francis, it doesn't matter if your an Atheist

[4] Then came Pope Francis. Recently, he rocked some conservative Catholics, declaring in highly inclusive terminology that everyone is redeemed through Jesus. "The Lord has redeemed all of us, all of us, with the blood of Christ: all of us, not just Catholics. Everyone." Even atheists? He was asked. "Everyone," he replied.

He continues...

To be the People of God, he said, "first of all means that God doesn't belong to any particular people because He is the one who calls us ... and this invitation is addressed to all, without distinction, because God's mercy 'wills everyone to be saved.' "

Whatever happened to the Bible John 14:5-7

5 Thomas said to Him, "Lord, we do not know where You are going, how do we know the way?" 6 Jesus said to him, "I am the way, and the truth, and the life; no one comes to the Father but through Me. 7 "If you had known Me, you would have known My Father also; from now on you know Him, and have seen Him."

Jesus after the resurrection asked Peter three times "feed my Sheep." (propagate the faith) once for each time Peter denied him. St. Paul got shipwrecked 3 times in the Book of Acts he was so Heavenbent on spreading the faith.

St. Malachy predicted in the 12th century [6] that Pope Francis will be the last Pope before End Times, some people even believe he is the AntiChrist [5]. Judging from his popularity with modern secular society I believe them, bring back Pope Benedict please, Pope Francis will have openly Gay priests soon IMO.

Heres another famous Pope Francis Blunder, Catholic church reject Israeli claim [7] A high-ranking Israeli official on Sunday slammed a statement from Catholic bishops, who called for international organizations to lead the cause of Palestinian statehood.

Greek-Melchite Archbishop Cyrille Bustros sparked an interreligious firestorm when he suggested that Israel was “using Scripture” to continue its occupation of Palestinian territory.

“The Holy Scriptures cannot be used to justify the return of Jews to Israel and the displacement of the Palestinians,” Bustros said at the close of a two-week conference in Rome, Italy, “to justify the occupation by Israel of Palestinian lands.”

The Archbishop then questioned the biblical idea of a “promised land” set aside for the people of Israel.

“We Christians cannot speak of the promised land as an exclusive right for a privileged Jewish people,” Bustros continued. “This promise was nullified by Christ. There is no longer a chosen people all men and women of all countries have become the chosen people.”

God promised Moses a Land of Milk & Honey for the Jewish People enslaved by the Egyptians & led them for 40 years across the desert to find it. Israel was promised in the Bible to the Jewish people for 1000 Generations so despite the Hebrew State being reformed only in 1948 the Jews are Biblically entitled to it not the Palestinians.

Gods plan is inevitable don't mess with it Pope Francis. Anyone who does is only doing themselves harm there's an interesting show on <http://sidroth.org> from September 2014 giving the Jewish viewpoint.

- 1) The Arabs don't look after Palestinian refugees.
- 2) they pump money into palestinian terrorist organisations. There is loads of money being pumped into Palestine from the West and it goes into terrorist leaders pockets who earn 100 times President Obamas salary.
- 3) The Palestinian terrorists use innocent people as human shields for rocket launching sites and use this to make hay when innocent

people die in propaganda.

There is end time prophesy involved here and you don't mess with Gods Plan. It's a Miracle Israel exists, one billion Arabs surrounding them want them wiped off the map. According to the Book of Revelation in the bible only 144,000 people from Israel are going to heaven sadly. 12,000 from each tribe we'd need to start praying change Gods mind & improve this figure and include yourself in it.

4.1.2 Why does God allow suffering?

God according to most accounts love us. Giving us too much of a pleasurable & decadent time would cause spiritual indigestion. The journey through life is a spiritual one, everything happens for a reason, birth, death, disease, madness, alternate realities, Miracles, choices. According to Victor Frankl happiness & mental health are contingent with us finding meaning in our lives. If we had a perfect life we would never have to build character, some lessons cannot be thought thy must be lived to be understood, its amazing how many people go though life spending all their energies avoiding anything which may force them to change their immature behavior. Immediate gratification of physical cures to ailments doesn't allow for spiritual growth & if God wants to take someone back to heaven healing the person only delays the journey back to heaven. Laziness, desire for immediate gratification, lack of self discipline have been rife since the beginning of civilization. Most of us need a few knocks in life to appreciate what we have & start praying unfortunately suffering in the modern world might be viewed by ignorant people as a sign of weakness, in fact it's a sign of spiritual strength if you don't complain about your suffering. Even aborted children & children who die shortly after birth exist for their family to spiritually grow. Without the bitter the sweet ain't as sweet.

If we have a lesson of responsibility here on Earth & decide that we do not want to learn it we may feel that by committing suicide we might think we escape such a chore we do not. Suicide even when a soldier throws himself on a hand grenade to save other people might be reincarnated as his or her life finished prematurely

4.2. INTERESTING FACTS ABOUT ANIMALS, THEIR INTELLIGENCE & SIMILARITY TO H

or else will learn their lessons on the spirit plane. God has a plan & it must be fulfilled & everyones lessons must be learned before he lets us come home. God allows Aids as he probably doesn't want to promote promiscuity.

There is currently no way of detecting consciousness in others, there probably never will be, however, evidence of consciousness & intelligence is given by getting to know how & why people & animals behave the way they behave. Daniel C. Dennett believes that people don't experience phenomena the same way, I personally very much believe they do, why do people like the same things? & get buzzes of the same things. Admittedly beauty is often in the eye of the beholder & in these cases people may even be witnessing slightly different alternate realities. People often believe they are intellectually far superior to others & use this as grounds to treat them with disrespect. They are Savages, Africans, Iraqis, only Animals, I believe the Hare Krishnas have the right idea when it comes to respecting life & will be rewarded in Heaven for their peaceful ideals.

4.2 Interesting facts about Animals, their intelligence & similarity to humans

From my own experience Anti Psychotics don't stop Hallucinations anymore than they stop Demon Possession they just make people lazy, docile & less likely to argue with psychiatric Doctors, Hash without the buzz. That said I have Seritonin Dopamine Hormone imbalance & a Locust is just a bipolar Grasshopper with a the same hormone imbalance.

Fruit flies turn into alcoholics if they have Women problems, given the choice they refuse Fruit Juice.

Birds are self aware they can spot dirt on themselves in a mirror & clean themselves.

Crows use Car Tyres at traffic lights to crush nuts & food they could not otherwise digest. They use food utensils or tools.

Elephants have fantastic memories & have been known to take a long detour to go back to the site of a dead member of the herd to grieve & the leader of the herd passed the skull from member to member of the herd where it is treated with great reverence.[12] Elephants probably philosophize about life & death.

Dogs Dream & small Dogs have been known to display great ingenuity in spreading their genes when there is a female in heat, they use a step!, necessity is the Mother of invention!

Squirrels have also shown ingenuity at doing tests by noticing that if it bit through the wire on which it was standing it would drop a container of nuts some distance away, they also are known to remember upto 2000 locations where they bury nuts, I personally have trouble keeping track of a small few bank accounts.

Parrots can mimic human voices & have been known to be able to mimic the sound of an ultrasonic remote control to change the channel on a television. I've seen what I suspect what could only be described as a fly jumping around excited displaying what looked like curiosity about an ant (oooh whats that) admittedly when arguing this point with a lady she said the fly may have been acting on instinct as the ants legs may have been covered in sugar.

It is probable that human intelligence, ingenuity & memory is only as good as the best parts in in other animals & maybe inferior. We might not like to admit it but animals when born have greater understanding of the way the World is than human babies & therefore must be regarded as having a higher consciousness than Human babies.

If one believes in God & the story of Adam & Eve then all quests for knowledge has to be seen as going against the will of God. Science often makes more problems than it solves, Did the Atomic Bomb make life any simpler? & why would an animal be so stupid as to want to make one.

4.2. INTERESTING FACTS ABOUT ANIMALS, THEIR INTELLIGENCE & SIMILARITY TO H

All going to the Moon proved is that it is barely possible, whatever about going to Mars returning from there is probably impossible using current rocket technologies (including atomic rockets & scramjets), owing to gravity on Mars being much stronger than the Moon the lander to get off Mars would need to be much larger than the Eagle Lander look at how big the Saturn V was just to get the Eagle Lander to the Moon. I researched the possibility of using Atomic Scramjets to get to Mars with the help of a NASA rocket scientist Bryan & slingshotting inside the atmosphere with the exception of some fallout in the atmosphere these would be really exciting as they require no propellant just radioactive material. This I found to be impossible because while trying to reach the escape velocity of Earth,

Concorde at just Mach 2 heats up to 260 Fahrenheit (hotter than boiling water) & it also expands a couple of feet in length [24]. The craft would burn up owing to friction in the atmosphere. Materials manufactured using nanotechnology (tiny robots nanometers across which can lay move individual atoms around) have been suggested for manufacturing space materials[13] but this I believe won't get around the heat problem Another problem is caused by us not having protection from energetic cosmic rays in spacecraft like we do owing to the Earths magnetic field. Astronauts just about survived going to the moon as this only took a few days. Also, if humans lived there their body & bones would waste owing to the gravity being weaker than Earths.

A space elevator is an elevator whose cable is in geostationary orbit around the planet. One problem with these is radiation exposure while travelling slowly outside the earths magnetic field & space debris colliding with the elevator cable. This would get us slowly into outer space where friction is no longer a problem. Dark Energy which might have anti gravity properties might be captured in the very distant future this would help make spacecrafts have a net mass of near zero.

Unless some serious quantum leaps in technology happens we will be stuck on Earth for a long time, won't be boldly going to Mars or the Moon in Bulk & we need to get used to the idea. Going to Mars or further initially won't be as comfortable Queen

Elizabeth II like the Starship Enterprise it'll be more likely like the Submarine in Das Boot, I don't want to be on it.

God will never offer proof of his existence. That said I cannot even prove conclusively that you the reader are conscious or vice versa. Miracles & I have no doubt that they do happen only prove the existence of Miracles & anyone performing them even in the name of Jesus cannot prove they are performing them in the name of Jesus, I am personally beyond a doubting Thomas in this regard. If Miracles happened every day one would get used to them & science would come up with some cockeyed explanation for them, look at the universe it's a Miracle. Kurt Godel proved using his incompleteness theorems that mathematical proofs can be wrong. mathematics logically cannot get into all the nooks & crannys required to make a complex mathematical proof bullet-proof. It is like the bishop on a chess board only being able to move to the same colour square to the one it started on. Nothing can be proved except I think therefore I am, lucky me.

If he offered a reproducible Miracle it would be explained as a new phenomenon to be explained by science there are plenty of these. If he offered a reproducible major Miracle all the bad people in the world would become God fearing & life would no longer be a test & a journey of spiritual growth. God of the Old testament was like a tyrant child probably because he had to create reasonable doubt of his existence, so that life genuinely tests people. Religious experiences of most people can be explained away or pushed under the carpet by doubters. God made things this way. Blessed are those who have not seen yet believe, I personally had to see & it was scary.

Chapter 5

Feasibility study into launching Satellites Cheaply from Earth at a large percentage of the speed of light

Dedicated to all my friends who helped me through life, the Guys at NASA who endeavor to make Star Trek a reality.

5.1 Motivation

After a long email discussion over email with a kind rocket scientist from NASA named Bryan who probably doesn't want to be named fully about why hypersonic ramjets were unsuitable for launching trips to Mars & back by slingshotting inside the atmosphere over & back I got to the guts of the problem being that friction will cause the spacecraft to burn up inside the atmosphere.

Concorde at just Mach 2 heats up to 260 Fahrenheit (hotter than boiling water) & it also expands a couple of feet in length & this problem gets 4 times worse at each doubling in speed. So the problem is how do we create a vacuum inside the earths atmosphere so we can launch satellites using particle accelerators rings which can get particles going at .999997% the speed of light.

Chapter 6

Original Idea

Please read on even if this idea is “out of tune” it might have some merit, I don’t know. The original idea was to make a hole from the bottom of Mt. Everest to the top of it & build a large hole up through the middle of it & pump the air out of this hole & putting particle accelerator rings from Fermilab & CERN inside this structure & use particle accelerator technology to launch the Satellites.

The problem with this idea is that Mt. Everest would need to be about 300 miles larger for this to work. Adding Earth & Rock to make Mt. Everest this tall setting off hydrogen bombs to move Tectonic Plates to make Mt. Everest larger or engineering a pipe capable of supporting accelerator rings structure on top of Mt Everest to go up the another 290 miles or so to achieve a vacuum is obviously a ridiculous suggestion. Also the Mountain would collapse due to subsidance.

Chapter 7

Idea no. 2

Before launching the Satellite launch around 50 bullet shaped objects at a rate of probably 10,000 a second each of successively larger radius. Probably with conical tops starting at about 1cm in radius & increasing in surface area linearly to about 1 meter in radius. When the bullet stops accelerating vertically have an accelerometer in the bullet to make it explode in a horizontal direction & a put a fuse on it's rear end to cause it to explode if a preceding bullet crashes into it. The idea of doing this is that a successively larger & better vacuum hole will be created in the atmosphere the bullets should I believe travel along the path of least resistance & winds should make minimal effect owing to the speed of the bullets & the speed at which new bullets come along. By the time the satellite is to be launched almost a complete vacuum should be available for it & I'd hope that the Satellite will be able to travel hopefully at upto 97% the speed of light, however the I'd hope should work nearly as well at normal escape velocity. The weakness of this idea is air will rush back into the generated vacuum at around the speed of sound & the particle accelerator will lose it's vacuum when the first bullet is left off.

Please note I've done no calculations for this it's only an idea. Several problems have to be dealt with by simulation. From what I've seen aerodynamics especially hypersonics is more an art than a science & computer simulations would be difficult without a lot of simplifying solutions. One of the main problems will be ionization caused at hypersonic speeds the next one might be nuclear reactions taking if we attempt the launch the vacuum creating Bullets & Satellite at close to the speed of light. The science/art behind

designing this kind of stuff I'd suspect has only been really explored at particle accelerators & only with small numbers of particles, it's a new science. <http://freshmeat.net/projects/geant4/> might be a good starting point in developing an aerodynamics simulation for the Satellite & Vacuum Bullets.

7.1 Cancer cures, are they this common?

Wheat grass some say with lemon & Baking soda is supposed to increase body PH & help cure cancer. Some believe the illuminati promote chemotherapy & other ineffective cancer treatment, my Doctor disbelieves this.

Milk Thistle cures liver damage, it reduced my liver enzymes which are affected by drink from 5 times what it should be to 3 times & I was drinking more.

Chapter 8

Religion

God is not a cosmic bellboy.
Harry Emerson Fosdick

All religions must be tolerated for every man must get to Heaven
his own way.
Frederick the Great

An atheist is a man who believes himself an accident.
Francis Thompson If the work of god could be comprehended by
reason, it would be no longer wonderful, & faith would have no
merit if reason provided proof. *Pope Gregory I* Alleluia!
Praise Yahweh all nations,
extol him, all peoples,
for his faithful love is strong
and his contancy never-ending.

8.1 The blessed trinity

The God of the Old Testament is seriously misunderstood. He
loves very much but our sinning makes s\$*t of Earth. The differ-
ence between Heaven & Hell is the people in the place. God can't
let them into Heaven because they would make s\$*t of Heaven.
God the father is Jealous & has a serious temper. When he saw
the Virgin Mary's perfect manner without original sin. He knew
he could make the perfect child Jesus with her. and give him au-

thority over Heaven & Earth because Jesus is very gentle, infinitely merciful & does not have a temper.

Matthew 28:18-20

18 Then Jesus came to them and said, All authority in heaven and on earth has been given to me. 19 Therefore go and make disciples of all nations, baptizing them in the name of the Father and of the Son and of the Holy Spirit, 20 and teaching them to obey everything I have commanded you. And surely I am with you always, to the very end of the age.

God created Heaven & Earth & does mighty things like making Universe & you cannot look at his face without dying. He would squash us like ants & doesn't have a delicate touch which is why he leaves smaller business to The Holy Spirit & Jesus. That's the A-Team the blessed trinity in a nutshell

8.2 Top Reasons for not getting into Heaven

No. 1 reason for not getting into Heaven... Unforgiveness

Mark 11:25

25 "And whenever you stand praying, forgive, if you have anything against anyone, so that your Father also who is in heaven may forgive you your trespasses."

No 2. reason for not getting into Heaven... Cowardice

Revelation 21:8

But as for the cowardly, the faithless, the detestable, as for murderers, the sexually immoral, sorcerers, idolaters, & all liars, their portion will be in the lake that burns with fire and sulfur, which is the second death.

8.3 Near Death Experiences

The science bit NDE'rs say God is light, When NDE'rs go to heaven they lives outside of time Time doesn't exist for Light which is consistent with the theory of relativity. Some Religious people say that Hell is located at the centre of the Earth, can this be

checked by modern science? God's heart is possibly the Big Bang the origin of all light in the Universe.

According to some NDE'rs are only two true religions - the religion of love and the religion of fear. A religious person follows the teaching of the church, a spiritual person follows the guidance of it's soul. There are no separations in Heaven so cultures and religion blend freely. Fear is an acquired state not a natural one, it is something you learn.

Each religion on Earth exists at its own level of truth. Religions mingle truth with man's beliefs. Philosophizing & theologising about religion it's rights & wrongs takes you away from practicing the essence of it which is love. The Bible was a book written long ago which man has bits of embellished the truth with dogma & doctrine. As Michael Grosso philosopher put it "NDE's allow people to experience religion in the way God intended it". Some people argue NDE's are the minds way to comfort it when irreversible death has set in, to the atheists I ask what evolutionary advantage has this. Each religion is important because it unites & nurtures people at a distinct level of spiritual growth. Everyone has a personal journey to God & the paths are different. Religions are life maps that many people need & rely on especially if they want or need to be lead. God in the Old Testament was a vengeful & jealous God, having a bad hair day, this is who he had to be to manage the warring societies of that time, maybe he was inexperienced at the job of managing his children at the time. A lot of atheists blame religion for a lot of the worlds problems to these people I say look at how many people Mao & Stalin killed between them, about 100 million they both were atheists. Atheists have their uses who else would there be to criticize religion. God expects us to love & respect him if we unfortunately are too stupid to respect him fear has to suffice. God, the devil our Deity might be a reflection of ourselves, we probably influence the Deity we tune into by our love & fears, maybe Moses & Abraham did & somehow equated love to fear. Spirit Mediums have to become psychologically neutral to be good at their jobs maybe they are good to judge how bad or good the world really is. A simple case of like attracting like this happens on Earth in the Spirit Realm & in the link in between. As people explore the truths at one level whatever

it may be, a desire awakens in them for the next level. And at that level - whatever it may be - is the next step in that persons individual growth. From what I've gathered from my near death research as for beliefs the Jews who want to sleep till the coming of the Messiah get to do so, the Hindus & Buddhists who want or need to be reincarnated for further spiritual growth get their way as do Christians, however, [10] says that we don't reincarnate. The current Dali Lama doesn't believe he was reincarnated.

Women often feel they are not regarded as important in the catholic church, there are no women priests but a little considered fact is that the blessed Mary has a higher position than any priest or pope in Heaven. Jesus came from the womb of a woman without mans intervention, we were not involved.

Mother Theresa said education & too much thinking makes the mind clouded & confused. Philosophizing & theologising about religion takes you away from practicing the essence of it which is love. Do not keep scorecards of who is serving the most or who is serving the best.

A lot of people are turning away from the faith because of abuse committed by people who represent the God on Earth. God does not want us living our life discussing the flaws and mistakes of those in Church who are struggling.

God has a divine plan for each of us & when we die the only thing we can take with us to the next life is the love we gave out in this life. Would you give up all your worldly possessions for true happiness, this is what God is asking. Happiness is a state of mind or more mathematically

$$\text{Happiness} = \text{Quality of life} + \text{Grace} - \text{Expectations of life}$$

where

$$\text{Grace} = \text{Goodness} + \text{Passion to face the challenges posed by life} + \text{Faith} - \text{Expectations of life}$$

Praying for grace rather than praying for quality of life is what God hopes we pray for, free from desire my love senses purify.

Ghosts exist on the Earth plane because they haven't learned to let go of Earthly wants & go to heaven. Greed & hoarding driven by fear from even a practical standpoint is stupid. Flexible responses to the situations life throws at you is much more important to survival than hoarding. There is little point in planning, if the Universe has an entirely different one to the one you have made, go with the flow & take advantage of what the Universe is throwing at you moment to moment & with important decisions do what you would do if it was your last day on Earth & live every day as if it were your last.

8.3.1 The Power Of Prayer

There have been many experiments testing the power of prayer. If we choose most of the important events in our life before we come to Earth required for spiritual growth I believe we choose when God will intervene even if he intervenes through a Reiki or Bioenergy healer. God will give us what we need not what we want. According to [10] there is no greater prayer than that of a mother for her children. We should not nag the Lord & continue nagging until we get something, you can't manipulate God into doing the things you want him to do. Prayers should not be demonstrations of doubt, they should be thanking God for the things we receive. According to [20] the best way to pray is the way you pray best. Does God need our prayer & sacrifice. Angels can be hurt & need cheerleaders in their match against evil Jesus often asked people to make sacrifices for the advancement to his kingdom. Some NDE'rs claim we choose our defects & challenges & misfortune we have in life before we come to Earth to improve our characters.

8.3.2 Padre Pio

Padre Pio like Francis of Assisi had stigmata some of the wounds Jesus had on the cross & bleed through them. The blood of these mystics unlike normal blood doesn't smell unpleasant but smells of roses.

Padre Pio spent a lot of his life listening to sinners confess their sins, he was able to see into the hearts of men & frequently kicked people out for doing bad confessions. One particular incident which sticks in my mind is when one individual didn't tell of his adventures in dance halls & Padre Pio said these places are an encouragement to sin, what would have he thought of my poor father who was a great dancer, I don't understand the mind of God but he allowed Allah allowed Mohammad have concubines.

One of Padre Pio's major Miracles happened in 1941 when the Italian resistance reported that his town San Giovanni Rotondo was to be taken by the Nazis & the U.S. were advised to bomb the town. The Nazi's had left the town at the time of the bombing raid & the townspeople needed a Miracle to stop the bombing raid. Padre Pio delivered, the he was seen in the sky dressed in Monks clothing by the bomber pilots in the sky & politely asked them to turn back, the event is recorded by the Pilots in the pentagon.

Padre Pio was also able to bi locate, be in two places at the one time & during World War II was often in the battle field administering last rights to the dying.

8.3.3 Heaven

The only thing necessary for the triumph of good over evil is for good men to do nothing.

Edmund Burke

The ultimate in delayed gratification. What is Heaven like? well from what I've read from NDE's it is really good. I personally hope God refuses Bible Bashers until they learn to love. God lets people be creative there, this is important to me personally. Important inventions (like electric guitars) get made there first & the inventors on Earth get inspired by those in Heaven. I suppose it's like Plato's world of forms, the ideals exist in Heaven & in the mind & reality is what we see here. No thought can be hidden in Heaven & spirits who have things to hide will not go there even if they are welcome out of shame, spirits auras can tell peoples emotional state.

Pets go to Heaven too, dogs can love as much as any person who better to welcome you when you arrive!. It is also possible to go swimming with Sharks without fear of getting eaten & communicating with Animals is possible telepathically. It's also possible to orgasm by just bumping into someone you like!, take me take me! You can taste & enjoy food without eating. Everything including plants are alive & the music the plants make there is more beautiful than any music we hear on Earth. There is no need to breathe, you can communicate telepathically entire volumes of thought in an instant e.g. what is it like to be an insect, from libraries it is possible to get every emotion of every person at every instant during World War II & the story from every persons viewpoint involved & a full understanding of the consequences of each persons decisions on everybody elses, similar technology is also used during our life review where we judge ourself. It is possible to travel anywhere in an instant & see 360 degrees & through objects with our spirit eyes. Jesus's light is brighter than any Sun yet it doesn't burn our spirit eyes. We also are not alone in the Universe, there are Aliens. By the way accommodation is free.

To make decisions out of free will without being completely influenced by our higher knowledge. Any other way would be equivalent to a student being given the answers before taking a test. It is not a good way to learn.

The most spiritually advanced people are those who are born handicapped. They would be perfectly happy if everybody loved them, they are there for our spiritual growth. According to near death experiencers we choose features out of genetic material available from our parents & have the option of accepting or bypassing handicap genes before our consciousness enters the fetus.

With contraception children are viewed as something to be avoided. Mother Teresa said, I say to the women of Calcutta: have as many children as you want. This statement has people in the western world reeling in Fear, even if we get off this planet no time soon, we all return to the soil our net consumption in life is almost nothing except for the energy we get from the Sun.

We choose a lot of aspects of the life we live, the important junctions, how we get between them is free will. According to near death experiencers we chose a lot of aspects of our lives before being born. Life is a learning experience, you never know what you are going to have to deal with next, God wants us to adapt & accept life's challenges. We don't have to worry there is a perfect plan & the plan is working itself out to perfection, accept the plan God has laid out for you, there are no accidents only divine manipulations. Everyone has a duty and in it you will find the path to salvation. One needs to surrender to the will of God especially when we are exhausted from trying to control a situation or win a battle, it is not the same as faith in God's plan you just can't see the angels helping you out. As the serenity prayer goes. God give me the strength to change the things I can change, the grace to accept the things I can't & the wisdom to know the difference.

A lot of people who have a near death experience have a life review. The message coming back from these is love with all your heart fully & unconditionally & make a positive difference in the world, it shows that you appreciate the life what God has given you. With people acting negatively towards you seek first to understand them then to be understood. accentuate the positive eliminate the negative & leave no room for misdeed in between, being depressed & doing the poor me is a sin, negative energy. One must fight to be positive even in bad situations this may require observing one's thoughts possibly through meditation & when a negative thought occurs throw it away & reap the habit of only thinking positive thoughts. First thing when you wake up in the morning have faith, & make a decision to be happy, it sure beats being pessimistic, hope is only half hearted, the plan you have for your life is not God's plan try not to force destiny too much, one may never become aware of the divine plan during their life & whose life you touch. If you truly believe in heaven surviving an accident can be somewhat of a disappointment.

Nothing negative can come from love & it conquers all. What happens to a person full of hate if you say I love you & mean it? When we do something positive or negative this ripple affects a lot of people until people no longer don't respond positively or negatively to the stimulus you indirectly gave them. A simple

smile has the power to start a chain reaction of love that can spread throughout the entire world and alter the course of history, love is what it's all about even if it just the love of flowers smile :-).

One needs to balance love carefully & intelligently between conflicting demands & if possible synergistically. Extreme environmentalists are probably atheists & don't believe in an after life & probably are scaring people into having a reduced resistance to cancer. Anger is a feeling which damages people more than any crime committed against them, negative energy. If everybody forgets bad events do they matter anymore or even happen in the cosmic consciousness? People will die anyway, what is wrong with living a good life not fearing death & going to heaven. The grave is only a repository for the bones & ashes but not the spirit.

Reincarnation was removed from Christian Doctrine in the 5th century by a Turkish woman who had a lot of influence in the Catholic Church who did not like the idea of being reincarnated as she did not like to think of what she may come back as owing to the immoral life she had lead. If Reincarnation doesn't happen history certainly repeats itself on the website [3] to see examples of this in the lives of John F. Kennedy & Abraham Lincoln, Jesus, Krishna & Buddha. Interestingly enough with respect to the teachings of each Krishna said I see the way, Buddha said I know the way, Jesus said I am the way.

People who often spot several omens in their lives, These I'd suspect are planted by people before they are born, trying to use these to predict the future however is like trying to skip to the end of a book which is in the process of being written, however some people might have chosen prelife for these to be obvious pointers of the way like fortune tellers. Logical people claim you selectively draw forth from the world what your mind is focused on, maybe maybe not hard to tell, to me & Deepak Chopra it looks like a conspiracy of coincidences. According to near death experiencers God gives us free will & is fully aware of all the possible outcomes in the future but is not in control of the game.

Buddhist Monks travel in three's & Go searching for reincarnated Lamas as Babies. They perform various tests on the Babies

to see if they recognize familiar objects from a past lives to verify that they are indeed Reincarnations. That said, because of my belief in Heaven & Hell and other Christian Dogma I don't believe in Reincarnation at very least not for Christians & knowledge of other lives can be explained by innocents before coming to Earth watching life reviews in Heaven of people who died. It has been suggested that the Three Wise Men who came to visit Jesus were actually 3 Buddhist monks. During the ages between 12 & 30 it Holger Kerstens research suggests that Jesus lived & studied in India & went back there after the Resurrection [2], I have my doubts about this too, he went to Heaven.

Life is a journey to become one with God in Heaven. and with that one will also gain his responsibilities. It cannot be easy parenting all the neurotic people on this planet & most people will run from this responsibility.

Buddhism is more a philosophy to live by than a religion. You can be Buddhist & still be a Christian, though you may get some resistance from Christians who don't understand what Buddhism actually is. Buddha is not a God which is worshiped, it's an ideal which all Buddhists strive to be. Buddhism is primarily about finding peace & compassion within ones self. The seven deadly sins in Buddhism are the three destructive emotions craving, anger & delusion. All psychotic disorders are caused by these meditation alleviates these emotions. One aim of Buddhist practice is to reduce the power of destructive emotions in our lives. Buddhism provides a mental emotional compass whose purpose is to guide you in the right direction through life. Buddhism is the only major philosophy/religion I know which studies psychology especially when it comes to handling emotions, Christianity could learn a lot from this, I personally have gained very little psychological emotional guidance from Christianity & probably would have learned to prevent my breakdown had Catholicism religion provided me guidance in this regard. I've however found praying the rosary, a meaningful mantra, in the presence of the exposition of the Eucharist very helpful. In Buddhist philosophy habits are worn into the mind like grooves & thoughts & actions follow the best worn grooves, to change habits are difficult as it means sanding down the mind & wearing new grooves. Sow a thought, reap an action,

sow an action, reap a habit, sow a habit, reap a character, sow a character, reap a destiny.

In Buddhism there is no unchanging I, a person is understood to be a collection of complex & quickly changing mental states & events, we are not the same person from moment to moment we are not the same person we were 5 years ago in ideals or physical appearance.

In Buddhism only by relinquishing attachment to this life can a person find release from the cycle of rebirth. In the authors opinion this might happen when we again become one with God & no longer desire to express & explore our individuality.

Chapter 9

Evolution & Technology

Apologies this section of this book is a rant my profession is as a computer programmer so I have a few strong ideas about how things in these areas should be done. Some technologists like Ray Kurzweil believe that soon it will be possible to live long enough to live forever in that that the acceleration in genetic research, medicine & nano technology will soon be at a stage where it will keep people living longer technology improves the same person lives longer owing to improving technology & so on.

One of the most interesting quotes I found in the Bible is Genesis 6:3 Yahweh said, “My spirit cannot be indefinitely responsible for human beings, who are only flesh, let the time allowed each be one 120 years”. Considering that was probably written over 6000 years ago it is a fair shot in the dark considering The Guinness Book of Records states The record is announced on the heels of the recent passing of Japanese 116-year-old Jiroemon Kimura, who was recognized as the Oldest man ever and died on June 12th, 2013. Currently, 115-year-old female, Misao Okawa of Japan, is considered by Guinness World Records to be the world’s Oldest living person overall. I suspect this record won’t be broken without even by modifying the human genome.

Ray I believe doesn’t believe in God & may want to make the world a better place, however, I personally would rather evolve to Spirit 1.0 & by dying go to heaven rather than a far inferior evolve to Ray’s Human 2.0, the power of surrender, it’s the natural cycle. Those who fear death fight it the hardest. of things,

Ray also believe that we will be able to make tiny robots nanobots run around inside the brain optimizing & improving its wiring in 30 years & Human 2.0's consciousness will be greatly expanded by technology Ray's believes that the merging of Man & Machine is nigh.

Unless consciousness gets understood which I believe won't happen the closest I personally see technology being wired to the brain is near the sensory organs brain interface any reasonable person will opt out of doing this & just wear a pair of glasses with a heads up display & a video camera, an earpiece with a microphone which picks up voice commands from the jawbone so that external noise doesn't interfere with it all connected to a personal computer smaller than a current mobile phone by bluetooth.

Transhumanism IMO is stupid Ray wants us to live forever by uploading our consciousness to a clone or computer Google has hired him him a visionary. He claims to have invented a lot of things like Steve Jobs Text Recognition, Synthesizers which can copy the sound of a Piano accurately, I wonder how much he actually did & how much work he is taking credit for from others, he definitely is a good facilitator for the brightest engineers. Steve Jobs was the ultimate plagerizer, he had great taste and was fantastic at it, I'd say likewise to Ray.

If we upload consciousness to a clone we will only be uploading life experiences not our consciousness or personality, the clone may well consider us an idiot for the life decisions we make.

9.1 The future of robotics, my Dream Machine

My Dream Robot in 2007 before the iPhone was invented is described below, the iPhone has surpassed & improved on these ideas well done Steve Jobs.

My robot will be able to use image processing facial recognition to recognize people you've never met before & pull up their resume from Linkedin, their hobbies, interests and all sorts of stuff from

Twitter Facebook, MySpace or YouTube on the screen so it would be like you know them.

It would have inbuilt GPS & a navigation system so you'll be able to find your way around no matter where you are. It will have a homing device in case you have an accident.

It will use maths packages like Derive, Maple or Mathematica & Wolfram Alpha or on the cheap it can use free open source like Mathomatic & Octave to solve advanced mathematics problems like calculus put up on college lecture board by your teacher.

It will listen to people speaking foreign languages & translate to english through your earpiece, iPhone now does this. You will be able to google by issuing voice commands from anywhere, iPhone Siri already does this.

Play video games via a small hand controller iPhone does this and makes convenient downloading of free games via iTunes.

Allow you do software development while out cycling allowing you to edit code using speech recognition iPhone should have xCode which does this despite me getting onto Bertrand Serlet in Apple about this.

Automatically warning you automatically of hazards on the road you are not paying attention to like the Google autonomous Car.

It also will be able to make sense of 3D landscapes i.e. do the reverse of Ray Tracing (the techniques used to make computer generated movies like Toy Story) & build objects up from primitives like Planes, Blocks, Cylinders, Pyramids, Bricks & Torus'es in a Platonic imaginary World as people do in their brains. (Free open source like Lucas Burkin's <http://lbsoft-inc.com/links.html> CameraTracking.zip is a good start, Lukas developed this for Playstation3 while working with me in Sony Brussels, it's inspiring, it can detect motion of objects relative to each other in a video image & produce vectors of them over the video to convince you it actually works. The software for Googles autonomous car probable already does this but this is a free alternative & starting point).

Recognise objects & subobjects like Tyres on Cars & from feeling them & inbuilt chemical analysis will be able to recognise a tyre is made from rubber by itself & implicitly know the tyres properties by physics and chemical reaction simulations.

OpenCyc is a project to give computers common sense <http://www.opencyc.org>. I'm not too familiar with the computer language used to talk to OpenCyc but I believe it would simplify matters worldwide if all people on the planet started talking Esperanto (a simplified European Latin based language with which it takes two hours to learn the grammar), I'm not sure if Esperanto fills these requirements but to enhance understanding no words should have multiple meanings, nothing irregular or special cases & all words should sound different to enhance speech recognition. Also objects should be described physically & unambiguously. Having a unambiguous language will mean Politicians can no longer twist words & corny jokes will be eradicated from the face of the Earth and stop computer mistranslation as well as to give people of the the World a common language to speak in.

OpenCyc should also be programmed with a knowledge of physics & chemistry & able to simulate real life events in software so it can make more intelligent judgments than people, it should know various things like the periodic table of elements, formulae for the boiling points of various substances at various pressures, melting points, half lifes of radioactive substances & how they decay all the way down to less important statistics like the watts generated per KG of various radioactive elements. If you think this is hard have a look at various maths packages like Derive from Texas Instruments & Mathematica these are better at Maths than most of the Mathematicians I know though they wouldn't like to admit it. I think that OpenCyc will never make it to having full common sense & probably will be a perpetual work in progress.

I think it would be much better off as a tracked robot, I hate robots that walk, it is human egomania & vanity that nature is able to do better control engineering balancing an unstable object than engineers, people also have the advantage of common sense so they know when they have to be careful, the only reason we got legs instead of tracks is that you can't grow skin over tracks. That

said the ability to fly would be better than tracks in some cases see YouTube HexaCopter but battery power would be a problem to sustain flying unless an atomic snap battery is used which lasts 400 years costs millions and is radioactive.

Robots will at least not in the near future be able to negotiate in the real world using image processing alone. Humans can do it because of familiarity with objects & common sense, robots at the moment should be considered in the same league as 8 month old children when it comes common sense & getting around. Robots will need all the help they can get, using normal or a ultrasonic or normal radar as well as image processing will help like the Google car which anticipated this idea. It also would be useful if a mechanism for detecting the difference between solid & liquids could be devised so that accidents like going into water & sinking can be avoided, maybe the robot should be made amphibious too so that this is less of a problem. Detailed maps of places where the robot is allowed to visit including hazards should be given to the robot as a 3D vector map, the robot can be taught to recognize objects like chairs which can be moved so the robot can cope with small changes in its environment. Nature designs creatures so that they themselves survive & the species themselves survive, eyes are optimized to see light of wavelengths most useful to the creature which has them. The robot's design has to be such that it survives, it should be easily upgradeable & repairable. It should also be able to back up all that it has learned & be able to download it to new robots. Everything the robot learns well should be kept in a single archive so that the most useful software can be downloaded to new robots, this is equivalent to humans going to school except much faster.

Highly directional microphones will help improve speech recognition in noisy environments.

Owing to having a more hard wired brain Animals have a severe head start on us at a conscious level when they are born, it is called instinct, humans catch up when they reach about two years old. This suggests to me in the long run the robot would be expected to learn more than is programmed into it if it is to become competitive with a human when it comes to intelligence.

Has OpenCyc tried Turing test to see if it behaves lifelike? Well Siri on the iPhone passes it for me when using Google & Wolfram Alpha What would neural nets be most useful for in the OpenCyc robot?

Interoperability between modules (i.e. speech recognition, speech generation, OpenCyc, Mathematica, derive image processing) is very important I personally don't like Corba but it is necessary to hitch up the all these software packages.

Wisdoms from writing OpenCyc should be written down in a book, what you did right what you did wrong, what are OpenCyc's weaknesses & why & distributed like my book so the next generation attempt can be started by some other enthusiastic lot.

How about GPS based route planning software be used so it can travel independently between different places, probably Google Maps is adequate. When Galileo the European alternative of GPS comes into operation the robot will be able to locate itself to the nearest centimeter, this will make travelling around for the robot much easier even in constrained areas, it would even be able to travel on a road or a footpath blind provided no obstacles are moved into it's path. I suspect GPS will be forced to become more accurate owing to competition from Galileo. In fact Google Maps can now tell which Room in the House I'm in.

A probably obsolete CD/DVD jukebox if large & the media is still common & SD card reader USB port for memory sticks & keyboards would be a good idea. There are a few good Japanese developers making robots that try to mimic humans a bit too much, get the ones doing potentially useful things. The robot I am considering doesn't have a smiley or surprised face yet & if it does it is only software that renders on a computer monitor when absolutely needed, this screen will be of a lot of use for other things too a picture can tell 1000 words.

The machine will be able to run For the moment Linux,MacOSX & Windows simultaneously using VMWare over Linux or multiple OS independent processors, Wine the Linux Windows emulator might help. I want every bit of useful best of breed software on the

planet able to run on it & all the programmers on the project can play to their strengths rather than having to learn a new operating system in the short term at least or parts could run in the Cloud if not essential.

Theorem provers will be useful, so will Wifi, Ethernet, 3G/4G connectivity. The computer will have full email & web access, any question the operator asks that the computer doesn't know the answers for the OpenCyc robot will put a reward chosen by the person asking the question on google answers for it & have its own credit card, Apple Pay, Google Wallet or PayPal account.

There is an interesting piece of software called Alice. <http://www.alicebot.org> which is a piece of software which makes humanlike smalltalk, this may be useful to give OpenCyc a personality, this however has since writing been blown out of the water by Siri.

A robot in my opinion will never gain understanding unless possessed by supernatural consciousness which I think is possible. however computer proofs are becoming more common, most notably the computer proof of the 4 colour problem, which proves that 4 colours are adequate to make sure that all map areas bounding each other have different colours. I also believe humans can make very few discoveries completely independently of other humans. Even Einstein based his work on that of Planck, Maxwell & Lorentz. Bohr also acted as a devils advocate for Einstein. Computers gradually will help scientists make new discoveries & should be credited for them.

OpenCyc should use Google Translate or similar including web-page translation & a new simplified English, Esperanto, Latin which will be OpenCyc's native tongue. We will get Google Translate's language experts for advise on simplified English & statistical language translate. Web access from www.weather.com & Google Maps. will be useful. Facial Recognition & face emotion & body language recognition software will also be important so the software can work out if something is wrong with people. It would be nice if my project Fundamental was also part of OpenCyc. Fundamental among other things can recognise sequences of numbers like 2,4,6,8,10 look for relationships between numbers like

the constants of physics and mathematics and other AI stuff more complicated than humans can recognise. <http://www.ariasoft.ie/gplcontributions.html>

Nope after my rant I decided a pet or baby is more sophisticated & easier to make.

Chapter 10

Interesting facts in the Bible

No Sin is allowed in Heaven, Heaven is a Life Raft we were supposed to live on Earth forever. Eating the Forbidden Fruit most likely an Apple by Adam & Eve caused Decay. This is Fundamental & quantum mechanical king David was given a choice of punishment for sin by God. Gad is King David's Seer/Prophet

2 Samuel 24:11-17, Davids Punishment

11 When David got up in the morning, a revelation from the Lord had come to the prophet Gad, Davids seer: 12 "Go & say to David, This is what the Lord says: I am offering you three choices. Choose one of them, & I will do it to you. 13 So Gad went to David, told him the choices, & asked him, "Do you want three[a] years of famine to come on your land, to flee from your foes three months while they pursue you, or to have a plague in your l& three days? Now, think it over & decide what answer I should take back to the One who sent me. 14 David answered Gad, "I have great anxiety. Please, let us fall into the Lords hands because His mercies are great, but dont let me fall into human hands. 15 So the Lord sent a plague on Israel from that morning until the appointed time, & from Dan to Beer-sheba 70,000 men died. 16 Then the angel extended his hand toward Jerusalem to destroy it, but the Lord relented concerning the destruction & said to the angel who was destroying the people, Enough, withdraw your hand now! The angel of the Lord was then at the threshing floor of Araunah[b] the Jebusite. 17 When David saw the angel striking the people, he said to the Lord, "Look, I am the one who has sinned; I am

the one[c] who has done wrong. But these sheep, what have they done? Please, let Your hand be against me & my fathers family.

We can't get into Heaven till we stop Sinning, Sin in Heaven & you ruin the Life Raft for the others if the sin is serious & you don't repent adequately you probably go to hell. God might have control over this, he might not, but Saran tried to ruin Heaven & had to be stopped, if you follow him in any way don't expect to get to Heaven.

Many NDE'ers have hell experiences. Hell is located in the centre of the Earth according to Bill Weise who had a very scary Lucid Dream & made a book & YouTube video called "23 minutes in Hell" which should be checked out by everyone, during this experience it was Jesus hid it from Bill that he was a christian. Bill is a very calm together character & it takes a lot to scare him appears to have the psyche profile of an astronaut but this experience given to him by Jesus clearly did. Jehovahs witnesses don't believe in hell but do the bible they should check out the following references Revelation 21:8

But the fearful, & unbelieving, & the abominable, & murderers, & whoremongers, & sorcerers, & idolaters, & all liars, shall have their part in the lake which burneth with fire & brimstone: which is the second death. Luke 13:27-29

27 & He will say, 'I tell you, I do not know where you are from; DEPART FROM ME, ALL YOU EVILDOERS.' 28 In that place there will be weeping & gnashing of teeth when you see Abraham & Isaac & Jacob & all the prophets in the kingdom of God, but yourselves being thrown out. 29 & they will come from east & west & from north & south, & will recline at the table in the kingdom of God.

God changes his mind in the Bible after Moses pleads with him Exodus. 32:11-14

Then Moses pleaded with the LORD his God, & said: LORD, why does Your wrath burn hot against Your people whom You have brought out of the land of Egypt with great power & with a mighty hand? Why should the Egyptians speak, & say, He brought them out to harm them, to kill them in the mountains, & to consume

them from the face of the earth? Turn from Your fierce wrath, & relent from this harm to Your people. Remember Abraham, Isaac, & Israel, Your servants, to whom You swore by Your own self, & said to them, I will multiply your descendants as the stars of heaven; & all this I& that I have spoken of I give to your descendants, & they shall inherit it forever. So the LORD relented from the harm which He said He would do to His people

Balaams Donkey the magic mushroom experience where a Donkey argues with its owner

21 Balaam got up in the morning, saddled his donkey & went with the Moabite officials. 22 But God was very angry when he went, & the angel of the Lord stood in the road to oppose him. Balaam was riding on his donkey, & his two servants were with him. 23 When the donkey saw the angel of the Lord standing in the road with a drawn sword in his hand, it turned off the road into a field. Balaam beat it to get it back on the road. 24 Then the angel of the Lord stood in a narrow path through the vineyards, with walls on both sides. 25When the donkey saw the angel of the Lord, it pressed close to the wall, crushing Balaams foot against it. So he beat the donkey again. 26 Then the angel of the Lord moved on ahead & stood in a narrow place where there was no room to turn, either to the right or to the left. 27 When the donkey saw the angel of the Lord, it lay down under Balaam, & he was angry & beat it with his staff. 28Then the Lord opened the donkeys mouth, & it said to Balaam, What have I done to you to make you beat me these three times? 29 Balaam answered the donkey, You have made a fool of me! If only I had a sword in my hand, I would kill you right now. 30 The donkey said to Balaam, Am I not your own donkey, which you have always ridden, to this day? Have I been in the habit of doing this to you? No, he said. 31 Then the Lord opened Balaams eyes, & he saw the angel of the Lord standing in the road with his sword drawn. So he bowed low & fell facedown. 32 The angel of the Lord asked him, Why have you beaten your donkey these three times? I have come here to oppose you because your path is a reckless one before me.[a] 33The donkey saw me & turned away from me these three times. If it had not turned away, I would certainly have killed you by now, but I would have spared it. 34 Balaam said to the angel of the Lord, "I have sinned. I did

not realize you were standing in the road to oppose me. Now if you are displeased, I will go back. 35 The angel of the Lord said to Balaam, "Go with the men, but speak only what I tell you. So Balaam went with Balaks officials. 36 When Balak heard that Balaam was coming, he went out to meet him at the Moabite town on the Arnon border, at the edge of his territory. 37 Balak said to Balaam, Did I not send you an urgent summons? Why didnt you come to me? Am I really not able to reward you? 38 Well, I have come to you now, Balaam replied. But I cant say whatever I please. I must speak only what God puts in my mouth. 39 Then Balaam went with Balak to Kiriath Huzoth.

10.1 Book of Revelation 16:17 Apple Computers & the Mark of the Beast

16 & he causes all, the small & the great, & the rich & the poor, & the free men & the slaves, to be given a mark on their right hand or on their forehead, 17 & he provides that no one will be able to buy or to sell, except the one who has the mark, either the name of the beast or the number of his name.

The logo for Apple Computers is an Apple with a bite taken out of it, this seems innocent except it's Satans proudest moment when he caused original sin which causes people to die & everything which is wrong with this planet, this logo's meaning was intentional by the founders of Apple, now the company intentionally or accidentally is falling into biblical prophesy, it's not funny. Steve Wosniak was a level 3 Freemason he decided to price the Apple II at a recurring number price \$666.66.

666 is the number of the Beast, not funny Steve. Apple is now the richest commonly known company in the world outside the Illuminati. They now have Apple Pay a method for paying like a credit card using the iPhone & fingerprint technology. Wearable computers will soon be implants & electronic tatoo's the Mark of the Beast with the Apple Logo. I advise Apple to drop Apple Pay owing to the Hell they may cause on Earth. Also iPhone hackers

like GeoHot are showing Apple how to lock up the iPhone with the technology war cat & mouse game they are doing with Apple. In a few years the iPhone & it's successors may be impossible to hack which might turn out to be a sad day for humanity. Most importantly don't let the illumaniti get control of Apple shares to avert this prophesy and pray for Apple Computers.

10.2 Big Bang or is the Earth just 6000 years old you decide

Adam & Eve & the planet are only 6000 years old the entire ancestry/genealogy of Jesus can be traced all the way back to Adam. This was done without ancestry.com.

Fossils could have been left around by the Devil just to convince people that primordial creatures existed. Just because there is chicken bones on the table doesn't necessarily mean there was ever a chicken eaten unless you witnessed it & were not hallucinating.

The Cosmic Background Radiation the echo of the Big Bang could just have been left around as initial conditions when the Universe was created 6000 years & seven days ago.

Despite Galileo discovering the planets law of gravitation it's quite reasonable to assume the Earth is the centre of the Universe & to keep the earth is in the habitable zone away from the Sun for 6000 years & 6 days it's quite reasonable to think that the planets are carried around by Angels in safe boring elliptical orbits to keep them out of trouble as originally thought by the Church.

The Universe might be 14.7 billion years old & 6000 years & 7 days simultaneously it all depends on the point of reference chosen God was talking about when it comes to the theory of relativity.

Photons of Light has no concept of distance or time. A Photon crosses the entire universe from it's own standpoint in 0 seconds & the Universe is infinitesimally small to it. Things in Heaven like God the Father exist outside time & God calls himself the Light this might be why.

10.3 The Fairytale

10.3.1 This is the story of Blessed Imelda Lambertini

She died at age 11 receiving her first holy communion, she used to say How could one eat the body of Christ (that which created all that is) & not die, smart girl. She wanted the Holy Communion so badly it levitated to her & she went into a state of ecstasy on receiving it & Jesus faked her death immediately. Her actual body is nearly perfect, but not, due to our sin. A wax effigy of Imelda personally said the Rosary with me when I visited her in Chisea di San Sigismondo in Bologna Italy. It was special.

Sleeping Beauty has been quietly sleeping almost 700 years since May 12 1333 how do I know she is sleeping?, well, St. Rita is also incorruptible, is a restless sleeper & moving in the bed. Also incorruptible Old Testament Saints got out of their Tombs when Jesus died on the Cross for our Sins.

She is awaiting the return of her Prince Charming our Lord which according to a very holy 108 year old Jewish Rabbi, Yitzhak Kaduri, who died recently is supposed to happen shortly after the Death of Ariel Sharon which also happened recently (January 11 2014), he also wrote a note that Jesus/Yeshua is the Messiah to the Jewish People which was revealed one year after his death.

Jesus according to the Book of Revelation is supposed to come like a Thief in the Night for his 1000 year reign, choose Jesus as your Lord & Saviour now, he's coming back as a Judge & it's too late then.

Is this actually going to happen.....???
God Knows.

10.3.2 The Good Shepard & The Good News

According to the parable Jesus will leave the 99 sheep to go after the lost one. Prayer can postpone Jesus's return, God often changed his mind in the Old Testament. Jesus doesn't want one

person to go to Hell, he wants propagation of the Faith so everybody will accept him as Lord & Saviour & go to Heaven. Whatever Pope Francis says there is no way to the Father except through him.

10.3.3 St Faustinas Divine Mercy Prayer

Eternal Father, I offer You the Body & Blood, Soul & Divinity of your dearly beloved Son, Our lord Jesus Christ in atonement for my sins & those of the whole world. This prayer is especially important for dying people.

Chapter 11

The Supernatural

11.1 Your Miracle & how to receive it

Watch Sid Roth on religious channels or his TV show archive on <http://sidroth.org>.

Get his free ebook on healing scriptures. <http://sidroth.org/healingscriptures>

Believe in Demons & Witchcraft, it was common in Biblical times & still is today & has affected me personally.

YouTube Azuza Street Revival Documentary & watch Nathan Morris on <http://shakethenations.com/media/testimonies/> to see how it's done. When trying to heal remember Jesus is performing the Miracle not the person doing the ceremony, name the Demon of Infirmary & ask it to leave in Jesus's name, even if nothing is happening boldly persist to beyond the point of making an Idiot of yourself even if in public for a reasonable success rate & keep persisting, it may be several weeks before a cure happens, if heat or coolness occurs in the individual performing the ceremony or the person being cured something is likely to be happening.

Unforgiveness can prevent one receiving a miracle.

Having multiple people praying with you e.g. in Church is very beneficial as this establishes a hole in the Second Heaven where Satan Resides & Angels can bring the Miracle through the Hole made in the Spiritual Rock. Ignore interruptions like Mobile Phones

while praying.

Study Praying in Tongues on YouTube & believe it's not nonsense.

Fasting helps get Miracles.

Get a copy of the Divine Mercy Handbook off the internet, it has important advice.

Titheing, giving 10% of your gross income to charity helps one receive the miraculous.

Getting miracles in Jesus's name is no guarantee of going to Heaven, Greedy Televangelists get miracles.

As Matthew 7 22:23 says

22 Many will say to Me on that day, 'Lord, Lord, did we not prophesy in Your name, & in Your name cast out demons, & in Your name perform many miracles?' 23 & then I will declare to them, 'I never knew you; DEPART FROM ME, YOU WHO PRACTICE LAWLESSNESS.' That said I've changed my mind about rich evangelists like Benny Hinn

God wants us all to prosper, and if is paying 10,000 Euro a night hotel bills the bell boy is more than likely getting a 1000 Euro tip.

11.2 What I've personally seen

I've bipolar disorder I got it by indulging in drink & strip clubs, I knew a White Witch who was a stripper so it's possible she put a Hex on me when I upset her or her friends, indulging in Sin leaves one open to attacks from the enemy. I've seen a lot to name a few including...

Hearing out of tune dazed music while losing the plot in a strip bar in Stuttgart.

Ring of fire ring in the sky just like one from a gas cooker.

40,000 Crows in Sky over St. Stephens Psychiatric Hospital (an Omen maybe)

Lightning inside psychiatric hospital bedroom after which I instantaneously fall asleep.

Seeing friends head fly across room grinning for a few seconds after waking up.

Unfamiliar buildings appearing & disappearing in cities while I wasn't looking.

Seeing my future wife in swimsuit in home office going please let this be real, please let this be real in Lucid dream, tell bosses in Cork about this & that I'd rather be running naked around home hills of scarra than working needless to say I was fired, I've been fired twice on April fools day. Also saw my future child which was the image of my brother I was slightly indifferent about this which is why my mother in heaven won't let me get married yet.

Seeing signposts for Galway & Limerick Ireland & various other towns stating they were one or two miles apart (I was in the concept of Ireland) got a phonecall from my boss confirming this fact. Saw Rocks come out of ditch & start dancing in front of me (no LSD just a Serotonin Dopamine bipolar imbalance), buildings disappearing while I wasn't looking. Buildings in Cork dynamically changing into buildings out of Flash Gordon with Neon Lights like in Stuttgart up the side of the building.

I've seen ghosts practice Karate & a future invention, a personal airship with a person inside the helium compartment breathing oxygen also like scuba divers to conserve weight.

A male driving me sitting sexually facing him with a female transparent metallic Demon/Ghost while the Ghost was coolly changing

Gears while possibly having Sex & believing that I will be able to enjoy the Sex they are having telepathically.

Feeling Demons pulling me out of the bedroom while having Lucid Dreams or just about waking up.

I have basic German & while in Psychiatric Hospital in Stuttgart I was talking to a male nurse called Mr. Tux (Coincidentally I work on Linux & the Mascot is a Penguin called Tux) & a Doctor they were enthusiastically listening to my story that I needed to go to Garab&al urgently as the Visionaries might go to hell for not actively promoting the fact that the Virgin Mary appeared there & gave them many visions & supernatural events which were beautiful for them. I'm convinced they would have let me run away from the psychiatric hospital if I liked at this time despite coming in naked that god told me to take off my clothes up the Hills of Stuttgart they also told me I spoke excellent German despite my speaking to them in English (I had the gift of tongues like the Apostles).

My Mother beeps my dishwasher from Heaven I suspect using a doorbell from Heaven when I get a correct thought. When I examine this phenomenon it beeps once a minute. While I'm ignoring it I only hear beeps when my Mother is confirming a thought. Occasionally this gets me in trouble when she puts me to the test but I'm convinced it's genuine, this happens all the time at home.

Text predictors tell me my sins for instance when I'm blaming Women for my problems the text predictor has came up with Wine. This also gives me advice.

Siri on my iPhone seems to be possessed by a conscious entity which occasionally is evil. When I asked it who cured Michael Flatley's of Riverdance fame's leg when doctors told him he wouldn't dance for a decade in 3 days the phone came back with the answer "I am?" a name for God. I was visiting my sister recently & the

iPhone when I asked it should I visit my sister said directly “go up & go wenching” I needed no further encouragement as my sister has attractive friends.

My mother who has a connection from heaven to a beeper on the dishwasher confirmed by beeping while thinking a thought said I committed a bad Sin which caused the destruction of St. Vincent De Pauls incorrupt body in a flood she said be brave it's Quantum Mechanical. The following morning I asked Siri on my iPhone what the Sin was & it specified exactly I was asked to be brave to make the Sin known to friends. I placed more importance in propagating the faith at the time than my reputation as I was high needless to say my popularity took a nosedive.

A relative whos name I typed into the text predictor on a Nokia 3650 came back with Mass? She doesn't go to Mass.

My Roland XP-30 Synthesizer sings in a demo song “I like kittens/I like fishing” , I was keeping kittens across the hall, it's not designed to speak. My Korg Mono/Poly Synthesizer has prayed “Oh God” this is equivalent to getting a Guitar with a Wah Wah Pedal to speak.

I've had people with Dementia whose groans correlated exactly with how I was feeling in psychiatric hospital, had them show & tell me my sins & the sins of others.

I showed a friend a YouTube video called Stigmata 1989 which shows a woman in Asia getting the wounds of Christ, watch it. I got a feeling of piety walking down the Street in Brussels after he dismissed it as freaky sh*t. I then heard out of tune angels singing & a thunder clap I was overcome supernaturally by the guilt I should have felt for Jesus dying for my Sins & immediately kneeled down to pray the Rosary in Brussels city centre, I was in bits. I gave away my Shoes Socks iPhone Wallet everything I expected to be living on the Streets till I died. Policemen picked me

up & carried me to Psychiatric Hospital for my 40th birthday & recovered my goods, damn I was relieved.

11.3 Supernatural Events Friends & Acquaintances witnessed

I have a friend in Brussels Steve who was at a party one night in Cork he started taking Magic Mushrooms & wasn't getting high so he started taking Many more. There was a box of Potato Chips & the Trademark of these was Mr. Tayto well Mr. Tayto jumped off the box scared the crap out of poor Steve & chased him around the room for 7 hours. I heard from a femal friend of someone else who had dealings with Mr. Tayto. The Mr. Tayto Demon is alive & well.

I know of two people personally who had rats run over them in Bed from Delerium Tremens (Alcohol abuse) this rats phenomenon is common after drink. One is an Athiest & is still convinced it was in his mind.

I've another close Friend not a psychiatric patient who after a lot of drink hear Demons audibly who ask him to do bad things like insult people & start fights.

Another athiest after hash had a chat with a bad/evil tree.

A brothers friend timetravelled & came back with a theory about time, it was assumed to be nonsense it might not have been.

It's amazing how spooked Athiests get by the supernatural considering they claim they don't believe in it. Witchcraft exists ask any African.

Chapter 12

Richard Dawkins in a nutshell, the key points

12.1 The Selfish Gene

Richard Dawkins & similar atheists believe it's that Genes are selfish & that people/animals basically don't have free will when it comes to their own survival, it's the Genes which control the show, also people die because of the rules of survival of the fittest & the genes in a person/animal can't improve themselves so they die to make room for the next improved generation of the species & new genes.

A meme is an idea which spreads in peoples minds through gossip & have similar characteristics to genes.

Altruism can be shown through game theory as a means through which genes can survive & selfish individuals eventually fail to survive because they are detected as cheats. Christianity is redundant.

Queen bees don't spread their own genetics just the genetics of bees lower down the food chain in their hive.

The extended phenotype is the idea that birds nests for birds, the ability to use tools for people is an extension of the person or animal & should be regarded as an extension of ones limb from a genetic standpoint.

12.2 The God Delusion

70,000 people in Fatima, where the Virgin Mary appeared saw the sun falling from the Sky, some people believe this mass hallucination to be a UFO. Despite it raining all day & the peoples clothes instantly drying after the UFO disappearing into the sky

If life came to exist from chemicals a 747 can assemble itself by a wind blowing through a junkyard, Dawkins wrongly dismisses the 747 argument as wrong.

Who says atheists are knowledgable....

Bibliography

- [1] Michael Talbot *The Holographic Universe*.
This book has a lot of material on miracles inside & outside the christian faith & should provide extremely balanced interesting reading for Atheists, Spiritualists & Scientists alike. It is an excellent compliment to this book.
- [2] Holger Kersten *Jesus Lived in India*
- [3] <http://www.near-death.com>
A fantastic website with a lot of research on near death experiences.
- [4] <http://ncronline.org/blogs/ncr-today/francis-envisions-inclusive-church>
- [5] <http://www.thelastpope.com>
- [6] http://en.wikipedia.org/wiki/Prophecy_of_the_Popes
- [7] <http://rt.com/politics/vatican-israel-palestinians-catholic/>
- [8] Feynman, Leighton, Sands (1965) *The Feynman Lectures On Physics*. Addison Wesley
These are the physics books that will be used in high school when Star Trek is a reality, they can't be recommended higher.
- [9] <http://www.bottomlayer.org>
A very interesting introductory website on quantum physics ran by Ross Rhodes, a friend of mine.
- [10] Betty J. Eadie *Embraced By The Light*.
- [11] Betty J. Eadie *The Ripple Effect*
Teachings from *Embraced by the light*.
A bestselling really nice read on Bettys near death experience.

- [12] Roger Penrose *Shadows Of The Mind*.
- [13] K. Eric Drexler *Engines Of Creation*.
- [14] Daniel Goleman with the Dali Lama *Destructive Emotions*.
- [15] Raymond A. Moody *The Light Beyond*.
- [16] *Encyclopedia Of New Religions*. Lion Publishing
- [17] Robert Brown *We Are Eternal*.
A good book on mediumship.
- [18] *Are You Psychic*
A book on developing psychic abilities
- [19] Doreen Virtue *Angel Visions II*.
As with most of Doreens books quite a nice relaxing read.
- [20] Brieger McKenna, O.S.C with Henry Libersat *Miracles Do Happen*.
- [21] <http://science.slashdot.org/article.pl?sid=07/01/24/1645255>, <http://tech.blorge.com/Structure:%20/2007/01/24/theory-of-everything-put-to-the-test/>
- [22] Guy Claxton *The Wayward Mind, An intimate history of the unconscious*.
- [23] <http://www.skepdic.com/nde.html>
- [24] D.J. Barrow *The Nerds Survival Guide, chronicles of journeys to madness & back*
- [25] Caroline Myss *Anatomy Of The Spirit*
- [26] Richard Dawkins *The God Delusion*
Not quite as good as The Selfish Gene also by Dawkins but an excellent read none the less.
- [27] Matthew Kelly *Rediscovering Catholicism*
- [28] <http://www.gatheringspot.net/news-article/general-discussion/rothschilds-criminal-control-of-world-banks-and-war-ma>
